CONTENTS OF VOLUME 229

Nature, pp. 1–644. *Nature Physical Science* (PS), pp. 1–244. *Nature New Biology* (NB), pp. 1–256.

ASTRONOMY

Airglow—Excitation at 6300 Å by soft electron fluxes—NICHOL (Tasmania) PS13

Astrophysics—New interpretation of extragalactic radio sources—REES (Cambridge) 312

Black holes—Extraction of rotational energy—PENROSE and FLOYD (London) PS177

Binary systems—Collapsar in ε Aur—CAMERON (NASA) 176
—Collapsars, infrared disks and invisible secondaries—STOTHERS (NASA) 178

Cosmic rays—Mechanism for modulation—MATHEWS, QUENBY and SEAR (London) 246
—Acceleration mechanisms and abundances—HAVNES (Utrecht) 548

Cosmic X-radiation—1/4 keV background—PACHEO (Observatoire de Nice) PS84
—Reply to Pacheo—BROWN (National Radio Astronom Observatory) PS85

Cosmology—Primordial spinning cores may have produced observable γ-ray flux—STECKER (NASA) . . . 105

Crab nebula—Ratio of pulsed to total X-ray flux at 20–80 keV—DEERENBERG and BLEEKER (Royal Dutch Academy of Sciences) . . PS113

Crab pulsar—Magnetic field direction around pulsar and in wisps—FORMAN and VISVANATHAN (Harvard) 39
—Possible high frequency modulation of light—STURROCK, BRACEWELL and SWITZER (Stanford) 186
—Interactions of possible planets with pulsar and wisps—REES, TRIMBLE (Cambridge) and COHEN (Princeton) 395

γ-rays—Experiment to detect pulsed γ-rays from the Crab nebula—KINZER, NOGGLE, SEEMAN and SHARE (US Naval Research Laboratory) 187

Galactic objects—Compton scattering of low frequency waves as source of radio emission—GETMANSEV (Radiophysical Research Institute, USSR) PS199

Interplanetary space—No dust cloud detected around the Earth—ROOSEN (NASA) 478

Interstellar dust—Silicate extinction related to the 2200 Å band—HUFFMAN and STAPP (Arizona) . PS45
—Proportions of graphite, iron and silicates—WICKRAMASINGHE (Cambridge) and NANDY (Royal Observatory, Edinburgh) PS81
—Reply to Wickramasinghe and Nandy—DULEY (York University, Toronto) . . PS81
—Possible origin of 2200 Å absorption band—MANNING (Canadian Department of Energy, Mines and Resources) . . PS115
—A prediction of the silicate hypothesis—KRISHNA SWAMY (Tata Institute of Fundamental Research) PS149
—Explanation of the polarization within the 4430 Å absorption band—WICKRAMASINGHE (Cambridge) and NANDY (Edinburgh) PS234
—Properties of silicate, silicon carbide and graphite mixture—GILRA (Wisconsin) . . . 237

Interstellar grains—Alignment by galactic X-rays plays negligible role—MACK (Houston) PS49

Instrumentation in Optical Astronomy—REDDISH (Royal Observatory, Edinburgh) PS38

Jovian decametric radiation—Variation of source A—GOERTZ (Rhodes) PS151

Lunar samples—Contaminant identified—GIBERT, FLORY and ORÓ (Houston) 33
—A possible explanation of some magnetic measurements—PUCHER (Geological Survey of the Federal Republic of Germany) . PS48

Massive stars—Production of helium—TALBOT and ARNETT (Rice) PS150

Neutron stars—Magnetohydrodynamic oscillations and pulsar signals—HIDE (Meteorological Office) . . PS114

Pulsars—X-ray data for NP0532—RAPPAPORT, BRADT and MAYER (MIT) PS40
—Linear polarization of PSR 2218+47—SHITOV (P. N. Lebedev Physical Institute) . . . PS179
—Circular polarization unexpectedly common—GRAHAM (Jodrell Bank) 326

Quasars—Two radio sources previously identified with galaxies may be quasars—LÜ (Yale) 477

Radio astronomy—Interpretation of Ohio source counts—JAUNCEY and NIELL (Cornell) . . . PS223

Radiogalaxies—Interpretations of rapid evolution — ROWAN-ROBINSON (London) 388

Recent Developments in X-ray Astronomy—POUNDS (Leicester) . . . 303

Redshifts—Are the external galaxies coming or going ?—DOLAN (Case Western Reserve) . . . PS47

Relativistic mechanics—An unnoticed theorem—PIETENPOL and SPEISER (Louvain) PS199

Sco X-1—Upper limit on radio emission at 327 MHz—APPARAO (Tata Institute, Bombay) . . . PS114

Solar astronomy—Use of radio observations to distinguish proton events—CROOM (Air Force Cambridge Research Laboratories) . . PS142

Solar physics—Evidence of quasi-periodic movements in the solar chromosphere and corona—DURASOVA, DOBRIN and YUDIN (Gorki State Institute) PS82

Solar–terrestrial relations—A negative sudden phase anomaly—OHSHIO (Radio Research Laboratories, Tokyo) PS239
Standard Values for the Solar Constant and its Spectral Components—THEKAEKARA (NASA) and DRUMMOND (Eppley, Rhode Island) PS6
Stars—Why some elements are overabundant in Ap stars—WATSON (Cornell) PS228
Supernovae—Connexion with extinction of dinosaurs—RUSSELL (National Museum of Natural Sciences, Ottawa) and TUCKER (American Science and Engineering) 553
Symmetric cosmology—A reply to Hoyle and Steigman—ALFVÉN (Royal Institute of Technology, Stockholm) . 184

Venusian clouds—Presence of HCl not possible—ARKING and RAO (California) PS116

X-ray astronomy—Some southern hemisphere sources — COOKE and POUNDS (Leicester) . . PS144
—Explanation of a break in the background spectrum—HORSTMAN and HORSTMAN-MORETTI (CNR, Bologna) . PS148
—Search for iron line emission from Sco X-1—POUNDS (Leicester) PS175
—Implications of the radial velocity of Sco X-1—WILSON (South Florida) . . . PS176
—Position of Cen XR-2, April 1967—FRANCEY (Tasmania) PS229
—Variability of Cygnus X-ray sources—FRANCEY (Tasmania) PS233
—Observations of Cen XR-4 and Nor XR-2—RAO, CHITNIS, SHARMA, PRAKASA-RAO and JAYANTHI (Ahmedabad) . 248
—Variable emission from M87—BYRAM, CHUBB and FRIEDMAN (US Naval Research Laboratory) 544
X-ray source—Energy spectrum of GX 333 + 25 — KITAMURA, NAKAGAWA, TAKAGISHI (Osaka), MATSUOKA, MIYAMOTO, ODA and OGAWARA (Tokyo) . . . 31
X-ray sources—The nature of the sources near the galactic centre—BRADT, BURNETT, MAYER, RAPPAPORT and SCHNOPPER (MIT) . . 96

BIOCHEMISTRY

Acetylcholine—Synthesis in the absence of exogenous choline—HEADING and BUCKLEY (Liverpool) . NB221
Adrenal enzymes—Neural stimuli regulate adrenal enzymes that evoke attack behaviour — REIS, MOORHEAD, RIFKIN (Cornell), JOH and GOLDSTEIN (New York) 562
Aflatoxin—Rats respond differently according to their nutritional status—ROGERS and NEWBERNE (MIT) . 62
L-Asparaginase — Effects of microcapsules on implanted mouse tumours—CHANG (McGill) 117
—Duration of *in vivo* effects on experimental metastasis—FIDLER (Pennsylvania) . . 564

Bacterial membranes — Inhibition of growth by interference with teichoic acid synthesis—HUGHES, STOW, HANCOCK and BADDILEY (Newcastle upon Tyne) NB53
—Chloramphenicol inhibits teichoic acid synthesis and glucose transfer—STOW, STARKEY, HANCOCK and BADDILEY (Newcastle upon Tyne) 56
—Shared lipid phosphate carrier for precursors of peptidoglycan and teichoic acids—WATKINSON, HUSSEY and BADDILEY (Newcastle upon Tyne) . . . 57
Bacteriophages—Arrangement of lipid and protein in particle—HARRISON, CASPAR (Children's Cancer Research Foundation, Boston), CAMERINI-OTERO and FRANKLIN (Public Health Research Institute, New York) NB197
Biochemical systems—Parameter sensitivity as a criterion for evaluating and comparing performance — SAVAGEAU (Michigan) 542
Brain RNA—Hybridization experiments do not confirm new species induced by learning—VON HUNGEN (California) 114

Cell cycle—Binding of proteins to DNA and their relation to growth in cultured mammalian cells — SALAS and GREEN (MIT) . . . NB165
—DNA synthesis during G1 phase—SEED (Cambridge) . NB218
Cell metabolism—Fibroblast cultures from foetal and post-natal skin differ in mode of glycolysis—CONDON, OSKI, DIMAURO and MELLMAN (Pennsylvania) . . . NB214
Chlorinated hydrocarbons—Effect on medullary bone formation in birds—OESTREICHER, SHUMAN and WURSTER (New York) . . . 571
Cyclic AMP—Prompt increase in human leucocytes during phagocytosis—PARK and GOOD (Minnesota), BECK and DAVIS (Pittsburgh) NB27
Cyclic AMP in Metabolism—PASTAN and PERLMAN (NIH, Bethesda) NB5

DDT—Patterns of geographic and temporal distribution suggest a causal role in chromosomal changes—CORY, FJELD and SERAT (St Mary's College, California) . . . 128
DNA—Direct determination of super helix density of closed circles—RÉVET, SCHMIR and VINOGRAD (Caltech) NB10
—Synthesis associated with inner nuclear membrane—MIZUNO, STOOPS and SINHA (Minnesota) NB22
—Buoyant density and satellite composition of DNA of mouse heterochromatin—MATTOCCIA and COMINGS (City of Hope Medical Center, California) . . NB175
—Isoxanthopterin affects the activity of transforming DNA in *Bacillus subtilis*—SMITH and FORREST (Texas) . . . NB217
DNA polymerase—Ultraviolet mutability of deficient strains of *E. coli*—WITKIN (State University of New York) NB81
—Function in host cell reactivation of bacteriophages φX and λ—KLEIN and NIEBCH (Max-Planck-Gesellschaft) . . NB82
DNA structure—Detection and isolation of tandemly duplicated genes—POLITO, GRAZIANI, BONCINELLI, MALVA and RITOSSA (CNR, Naples) NB84

Enzymes—Is the ontogeny of glucuronyl transferase adaptive?—CUSWORTH and SIMONS (College of William and Mary, Virginia) . . . NB216
Enzymology—Significance of structural similarities between α-lytic protease of Myxobacter 495 and elastase—McLACHLAN (MRC, Cambridge) and SHOTTON (Bristol) . . NB202

Fibroblasts—Survival increased by serotonin—BOUCEK and ALVAREZ (Miami) NB61

Glycogen metabolism—Effects of acetylcholine on isolated perfused rat liver suggest parasympathetic control—OTTOLENGHI, CANIATO and BARNABEI (Ferrara) . . . 420
Glycolipid synthesis—Decrease in virus transformed cells could result from loss of contact inhibition—ROBBINS and MACPHERSON (Imperial Cancer Research Fund) . . . 569

Hybrid cells—Haemolytic complement activity restored in C5 deficient mice by gene complementation—LEVI (Duke) and LADDA (Walter Reed Army Institute of Research) . NB51
Hypothalamic thermodetectors — Damaged by red pepper agent, capsaicin—SZOLCSÁNYI, JOÓ and JANCSÓ GÁBOR (Szeged) 116

Interferon induction—Activity of double stranded RNA—COLBY, STOLLAR and SIMON (California) . . NB172
Insecticides—Parathion persists in soil for 16 years—STEWART, CHISHOLM and RAGAB (Agricultural Station, Nova Scotia) . . . 47

Macrophages—Association with specific antibody producing cells—MILLER and AVRAMEAS (Villejuif) . NB184
—Functional heterogeneity in the *in vitro* induced immune response—WALKER (Public Health Research Institute, New York) . NB211
Membranes—Na^+ and K^+ transport channels are separate—ROJAS (Chile) and ARMSTRONG (Rochester) NB177
Metabolism—Non-ferritin iron compound in rat intestinal mucosa during iron absorption—WORWOOD, EDWARDS and JACOBS (Welsh National School of Medicine) . . 409
Monosodium glutamate—No ill effects on infant rodents or dogs—OSER, CARSON, VOGIN and COX (Food and Drug Research Laboratories, Maspeth) 411

Neovitamin B_{12}—Identification as cyano-13-epicobalamin—BONNETT, GODFREY, MATH (London), EDMOND, EVANS and HODDER (Oxford) . 473

Peptides—Sequenced by additive Edman degradation—VANCE and FEINGOLD (Pittsburgh) . . . 121
Pesticides—DDT moves from fat to muscle cell during starvation of pigeons—FINDLAY and DEFREITAS (National Research Council, Ottawa) 63
—Half the DDT applied to crops may enter the atmosphere during evaporation—LLOYD-JONES (Bristol) 65
Phage f1—Enzymatic synthesis of DNA : RNA hybrid and double stranded RNA—ROBERTSON (Rockefeller) NB169

Phage lambda—Exonuclease degrades surplus DNA after recombination—CASSUTO and RADDING (Yale) NB13
Polysomes—Regulation by insulin and amino-acids in liver—EKREN, JERVELL and SEGLEN (Oslo) . NB244
Protein—Polymorphism as a phase of molecular evolution—KIMURA and OHTA (Japanese National Institute of Genetics) 467
Protein evolution—Clupeine Z as a cross-over product—FITCH (Wisconsin) NB245
—Globins and marsupial–eutherian divergence—AIR, THOMPSON, RICHARDSON (New South Wales) and SHARMAN (Macquarie) 391
Protein synthesis—One molecule of guanosine triphosphate present in each 30S initiation complex—THACH and THACH (Harvard) . . NB219
—Initiation of adenovirus proteins—CAFFIER, RASKAS, PARSONS and GREEN (St Louis) NB239
Protein structure—Behaviour of amino-acid residue next to α-helical segment—JERONIMIDIS and DAMIANI (Rome) NB150
Pyrrolizidine alkaloids—Pyrrolic metabolites but not 1,2-epoxides can initiate chronic liver damage—CULVENOR, EDGAR, SMITH, JAGO and PETERSON (CSIRO, Melbourne) NB255

Ribonuclease—Simplification of proton magnetic resonance spectrum by difference spectroscopy—KING and BRADBURY (Australian National) . 404
Ribosomes—Ester linkages forged by peptidyl transferase—FAHNESTOCK and RICH (MIT) NB8
—Stabilization of 70S ribosomes by spermidine—HARDY and TURNOCK (Leicester) . . NB17
—Cytoplasmic synthesis of ribosomal proteins independent of nuclear rRNA synthesis—CRAIG and PERRY (Philadelphia) . . NB75
—60S species in HeLa cell mitochrondria—ATTARDI and OJALA (Caltech) . . . NB133
—Ribonucleoprotein particles involved in mitochondrial protein synthesis in HeLa cells—BREGA and VESCO (MIT) NB136
—Absence of 5S component in mitochondrial ribosomes of *Neurospora crassa*—LIZARDI and LUCK (Rockefeller) NB140
tRNA—Precursor molecules isolated—ALTMAN (MRC, Cambridge) NB19
—Recognition sites studies using incomplete tRNA Val molecules—MIRZABEKOV, LASTITY, LEVINA and BAYEV (USSR Academy of Sciences) NB21
—High resolution nuclear magnetic resonance of hydrogen bonded protons in water—KEARNS, PATEL and SHULMAN (Bell Telephone Laboratories) 338

Soil—Accurate determination of acidity of soil water—DOEMEL and BROCK (Indiana) 574

Tobacco mosaic virus—States of aggregation of protein subunits—DURHAM, FINCH and KLUG (MRC, Cambridge) 37
—Polymerization of protein subunits—DURHAM and KLUG (MRC, Cambridge) . NB42
—Assembly of particles from RNA and disks of protein—BUTLER and KLUG (MRC, Cambridge) 47
Tobacco smoke—Electron spin resonance analysis of free radicals—BLUHM, WEINSTEIN and SOUSA (US Army Natick Laboratories) 500

BOTANY

Coffee rust—Airborne spores may spread disease—BOWDEN, GREGORY and JOHNSON (Rothamsted Experimental Station) 500
Conserving Rare Plants in Britain—PERRING (Monks Wood Experimental Station) and WALTERS (Cambridge) 375

Forests—Climate and nutrients may effect distribution on tropical mountains—GRUBB (Cambridge) . . 44
Fungi—Diploid lines of *Puccinia graminis tritici* in axenic culture—WILLIAMS and HARTLEY (Sydney) . NB181

Leaves—New method for measuring surface area—THOMPSON and LEYTON (Oxford) 572

Phloem—Filamentous proteins from sieve tubes resemble other structural proteins—KLEINIG, DÖRR, WEBER and KOLLMANN (Freiburg) NB152
Photosynthesis—Distribution in plant canopies—FISCHER and WILSON (Queensland) NB30
Phytochemistry—Seeds derive ecological advantage from L-dopa—BELL (Texas) and JANZEN (Chicago) . 136
Plant growth—Temperature effects the shoot meristem and leaf extension—WATTS (Nottingham) . . . 46
—Peroxidase involved when hydroxyproline-rich protein in cell walls is increased by ethylene—RIDGE and OSBORNE (Oxford) NB205

CHEMISTRY

Actinolites—New data from Mössbauer spectra—GREAVES (Oxford), BURNS (MIT) and BANCROFT (Western Ontario) . . . PS60
Adsorption—Mercury adsorbed on chromium oxide gels—BAKER and SING (Brunel) PS27
Anomalous water—It is not "polywater"—PETHICA, THOMPSON and PIKE (Unilever) PS21
—Microwave dielectric measurement—HOEKSTRA, SWINZOW and ACKLEY (US Army Research Laboratory, New Hampshire), and DOYLE (Dartmouth College) PS92

Chemical bonds—X-ray data on hydrogen bonds—KROON, KANTERS and PEERDEMAN (Utrecht) . PS120
Chemical equilibrium—Thermodynamics, chemical reactions and molecular biology—BENZINGER (US Naval Medical Research Institute) . . 100
Chemical kinetics—Rate equation in nonisothermal kinetics—GILLES and TOMPA (Union Carbide, Brussels) PS57
Chemistry—Formation of copper(II) arene complexes on montmorillonite—MORTLAND and PINNAVAIA (Michigan) PS73
—New example of helical polymerization—BRACK and SPACH (Orleans) PS124
—Dimerization of Biebrich scarlet and the monomer-α-chymotrypsin interaction—HAGUE, HENSHAW, JOHN, POOLEY (Kent) and CHOCK (Max-Planck-Institute) . 190
—Hydrolysis of benzyl chloride—HILLS and VIANA (Southampton) 194
Clay—Lattice image of organo-montmorillonite—SUITO and YOSHIDA (Kyoto) PS22
Crystallography—Anomalous X-ray scattering factors for light atoms—ENGEL, ZECHTMEISTER, RÖHRL, BRANDL, NARAYANAN and HOPPE (Max-Planck-Institute, Munich) PS28
—Swelling of montmorillonite in water—GRAHAM (CSIRO) and ROLFE (Government Chemical Laboratories, Western Australia) PS59
—Transmission of structural information—DISTLER and OBRONOV (USSR Academy of Sciences) PS242

Defence of the Berkeley Work on Alpha-Emitting Isotopes of Element 104—GHIORSO, NURMIA, HARRIS, ESKOLA and ESKOLA (California) 603
Diamonds—Determination of boron content and profiles — CHRENKO (General Electric) PS165
Diffusion—Through nematic liquid crystals—TEUCHER, BAESSLER and LABES (Drexel) PS26

Electrical breakdown—Time lag before breakdown in a dielectric liquid—METZMACHER and BRIGNELL (City University) PS184
Energy—Transfer from excited gas molecules to solids — FORIER, DAUCHOT and VAN CAKENBERGHE (Mons) 488

Flash photolysis—Kinetic mass spectrometry of NO_2—BRADLEY, CAPEY and GILBERT (Essex) 41
—Reaction of $O(^3P)$ atoms with ozone—ELLIS, McGARVEY and McGRATH (Queen's University, Belfast) PS153
Fluorescence—Three photon excitation induced in a dye by a laser—SELDEN (London) PS210
Fluorine—Decomposition and pyrohydrolysis methods of estimation compared—KAKABADSE, MANOHIN, BATHER, WELLER and WOODBRIDGE (Manchester) . . . 626

Hair—Why aromatic compounds are absorbed by hair to a greater extent than their hydroaromatic analogues—BREUER (Unilever) . . PS185
Hydrated electrons—Mobility activation energy—CERCEK (Christie Hospital and Holt Radium Institute, Manchester) PS11
Hydrogenolysis—Extent of carbiding effects role of molybdenum—SINFELT and YATES (Esso, New Jersey) PS27
Hyperfiltration—Stabilization of glass membranes with $AlCl_3$ solution—VERNON BALLOU, LEBAN and WYDEVEN (NASA) . . PS123

Lead vapour—Nucleation in shock tube —HOMER, HURLE and SWAIN (Shell Research Limited) . . . 251

Nitromethane—Quadruple splitting in microwave spectrum—COX, WARING (Bristol) and MORGENSTERN (Ulm) PS22

Nucleotide bases—Bridging capability of adenine and Cu(adenine)$_2$ $Cl_2.3H_2O$ crystal structure—DE MEESTER, GOODGAME, PRICE and SKAPSKI (London) 191

Oxidation—Why addition of Al and Si makes iron more resistant—VON FRAUNHOFER (London), HOAR (Cambridge) and PICKUP (Gas Council) PS88

Physical chemistry—Strong effect of nitrocellulose on electrical resistivity of arylethynyl copper(I) compounds —OKAMOTO, MINCER (New York), GOLUBOVIC and DIMOND (Air Force Cambridge Research Laboratories) . . . PS157

Salts—Random heap structure of molten salts—PELTON (Toronto) . PS57

Solvated electrons—Structure in liquid ammonia—CATTERALL (Salford) . PS10

GENERAL

Decimalization under Cromwell—WEBSTER (Oxford) 463

Evolution—Denial of Anderson's viral hypothesis—WEST (Virginia Polytechnic Institute) 637

Human crowds—Sexual differences show up in velocity distributions—HENDERSON (Sydney) 381

Marriage and Fertility in Academic Life —HUDSON and JACOT (Edinburgh) 531

Pangloss and Jeremiah in Science—ROSE (London) 459

Problems facing University Science—JEVONS (Manchester) 601

Statistics—Non-parametric roughness penalty for probability densities—GOOD (Virginia) . . . PS29

GEOPHYSICS

African geology—Seismic measurements in the Gregory rift — GRIFFITHS, KING (Birmingham), KHAN (Leicester) and BLUNDELL (Lancaster) PS69

—Gravity measurements in the Gregory rift—KHAN and MANSFIELD (Leicester) . PS72

Antarctic cirques—Some may be of Tertiary age—SELBY and WILSON (Waikato) 623

Asian geology—Faults in south-east Asia —RIDD (BP, Singapore) . PS51

Astrogeology—Possible meteoritic origin of Pretoria Salt Pan—MILTON and NAESER (US Geological Survey) PS211

Atmosphere—Mechanism for the fixation of nitrogen by lightning—FERGUSON (Colorado) and LIBBY (California and Colorado) 37

Atmospheric dust—Analysis of collections made off the coast of West Africa —CHESTER and JOHNSON (Liverpool) 105

Atmospheric SO_2—High rate of oxidation to sulphuric acid—COX and PENKETT (AERE, Harwell) . . 486

Benthic foraminifera—Bathymetric patterns of calcareous and arenaceous assemblages in the southern oceans—THEYER (Southern California) PS207

Crustal structure—Deep underwater trough in channel between New Britain and New Ireland—BROOKS, CONNELLY, FINLAYSON and WIEBENGA (Australian Bureau of Mineral Resources, Geology and Geophysics) PS207

Dating—Ion exchange method for terrace sediments—MORTIMER (Santiago de Chile), CLARK (Queen's University, Ontario) and SCHUFLE (New Mexico Highlands University) PS54

Deep currents—Measurements in the South Indian Ocean—WARREN (Woods Hole Oceanographic Institution) PS18

Earthquakes—New Zealand data and stresses around an island arc—HATHERTON (Wellington) . . PS119

Earth's crust—Central part of Baffin Bay is oceanic—BARRETT, KEEN, MANCHESTER and ROSS (Bedford Institute, Nova Scotia) . . . 551

Environment—Decrease in clear air transmission above Los Angeles—HODGE (Seattle) 549

F layer—Solar cycle variations in F_2 at low latitudes—RASTOGI (Physical Research Laboratory, Ahmedabad) PS240

Geochronology—Potassium argon ages from the volcanic province of northern Tanzania—EVANS, FAIRHEAD and MITCHELL (Newcastle) PS19

—Age of the Devonian polar shift—EVANS, MITCHELL, EMBLETON and CREER (Newcastle upon Tyne) PS50

Geology—Regional and global fault slip rates from seismicity—DAVIES (Caltech) and BRUNE (California, San Diego) PS101

Geomagnetic micropulsations—Significance of Alfvén irregularities—KIKUCHI (NAS) PS79

Geophysics—Gondwanaland and continental drift—TARLING, (Newcastle) 17

—Evidence for crust in the deep ocean derived from continental crust—BACON and GRAY (Cambridge) 331

Geotectonics—Evolution of Kenya Rift Valley—BAKER and WOHLENBERG (Nairobi) 538

Glacial relicts—Teesdale rarities in Flandrian times—SQUIRES (Durham) . 43

Glaciology—Hot spot and surge movements of Fox Glacier—CLASSEN and CLARKE (British Columbia) . . 481

Gondwanaland—New positions for India and Australia—VEEVERS, JONES and TALENT (Macquarie) . . . 383

Iceberg drift—Four icebergs tracked off Labrador — JONES and DIEHL (Defence Research Board, Canada) . 189

Ionosphere—What is the origin of spread-F ?—BOWMAN (Queensland) PS117

Irish geology—Permian–Triassic transition sequence at Kingscourt—GARDINER (Geological Survey of Ireland) and VISCHER (Utrecht) . PS209

Lake water—Precipitation of the vaterite form of calcium carbonate in a Norfolk lake—ROWLANDS and WEBSTER (AERE, Harwell) . . PS158

Lake sediments—Inorganic aragonite precipitated in freshwater—MÜLLER (Heidelberg) PS18

Late Quaternary—Meteorology and oceanography in the equatorial Pacific —QUINN (Oregon State) . . . 330

Lightning—Calculation of field recovery —ILLINGWORTH and WORMELL (Cambridge) PS213

Magnetic anomalies—Possible clue to relation in time of oceanic rises and island arcs—JONES (Macquarie) . 400

Meteorites—A new carbide found in iron meteorites—SCOTT (Cambridge) PS61

—Probable impact crater in Sweden—SVENSSON (The Norrland Foundation) PS90

—Age of Bovedy fragments—TOBAILEM, NORDEMANN and GRJEBINE (CNRS) . . PS118

Meteorology—Stratospheric properties of Bali dust—SPARROW (Minnesota) 107

—Consequences of the Clean Air Act not as simple as they seem—LAWRENCE (Meteorological Office) 334

Microseisms—Refraction of microseisms approaching Cochin — KRISHNA KARTHA (Makapuu Oceanic Center, Hawaii) PS202

Nitrates—Limestones may release nitrates to ground waters—CHALK and KEENEY (Wisconsin) . . . 42

Observatories—Atmospheric noise at Mauna Kea and Los Alamos—BEERY and SHIPLEY (California) PS236

Ocean crust—Is it Pre-Mesozoic in the Wharton Basin ?—DIETZ and HOLDEN (ESSA) 309

Ocean floor—Location of ancient mid-ocean rises—BROOKFIELD (Guelph) PS204

Ocean wave spectra—Doppler radio return method — HASSELMANN (Woods Hole Oceanographic Institution) PS16

Oceanography—Carbon dioxide in the Bering Sea—KELLEY and HOOD (Alaska) 37

—Measurement of tilt of a frozen sea—WEBER (Canada Department of Energy, Mines and Resources) and LILLESTRAND (Control Data Corporation) 550

Optical radar—Measuring atmospheric temperatures and aerosol to molecule ratios in the troposphere—FIOCCO, BENEDETTI - MICHELANGELI, MAISCHBERGER and MADONNA (European Space Research Institute) PS78

Palaeogeography — Expanding Earth hypothesis not confirmed—VEIZER (Australian National) 480

Petrology—Immiscibility between feldspathic and gabbroic magmas—PHILPOTTS (Connecticut) . . PS107

Planetary science—Malakal meteorite in the Sudan—DAWOUD and VAIL (Khartoum) PS212
Plate tectonics—Pan African orogeny in Nigeria—McCURRY (Ahmadu Bello) PS154
Plio-Pleistocene—Correlation of K–Ar dates for Omo Valley formations—BROWN (California) and LAJOIE (Lamont–Doherty Geological Laboratory, New York) 483
Pozzuoli Event in 1970—YOKOYAMA (Hokkaido) 532

Rainfall—Less rain seems to fall at sea than on the coast — ELLIOTT, EGAMI and ROSSKNECHT (Oregon State) 108
Rock magnetism—Decay of marine magnetic anomalies by ferrous ion diffusion—BANERJEE (Franklin Institute) PS181
Rock shear waves—Propagation anisotropies and seismic studies—CHRISTENSEN (Seattle) 549

Scottish geology—Supposed corals from the Dalradian sequence—BORRADAILE (Durham), ROBERTS and SCRUTTON (Newcastle upon Tyne) PS179
—Reply—DEWEY and PANKHURST (Oxford) . . PS181
Sea floor spreading—East Pacific Rise existed in early Pliocene—TAYLOR, BRENNAN and O'NEILL (US Naval Oceanographic Office) 396
Seismology—Ground motions associated with acoustic waves—SORRELLS, McDONALD and HERRIN (Southern Methodist University, Dallas) . PS14
—Deep seismic reflexions from random data—MERZER (Cambridge) PS243
—Natural Earth oscillations by cryogenic gravity meter—TUMAN (Stanislaus State College) . . 618
Storm clouds—Changes in brightness given the name crown flash—GALL and GRAVES (Michigan) . . 184
Subglacial limestones—Pressure meltwater interpretation—PAGE (Exeter) 42
Submarine canyons—Measurements of currents—FENNER (Park Forest, Illinois), KELLING (Wales) and STANLEY (Washington) . PS52

Tyrrhenian Sea—Evidence for subsidence of a continental terrain—HEEZEN (Columbia), GRAY (Libya), SEGRE (Messina) and ZARUDSKI (Woods Hole) 327

Upper atmosphere—Variation of ion drag causes super-rotation — RISHBETH (Radio and Space Research Station) . 333

MEDICAL SCIENCE

Acetylcholine—Postsynaptic effects on potassium and chloride activities in identifiable neurones of *Aplysia*—KUNZE and BROWN (Utah) . NB229
Allergic response—Effectiveness of mixed skin cell–leucocyte reaction in induction of DNA synthesis—MAIN, COCHRUM, JONES and KOUNTZ (California) NB89
Allergy—Essential chemical requirements for encephalomyelitis—WESTALL and ROBINSON (California), CACCAM, JACKSON and EYLAR (Salk Institute) 22
d-**Amphetamine**—Response of brainstem neurones abolished by reserpine—BOAKES, BRADLEY and CANDY (Birmingham) . . . 496
Anaemia—In bursectomized irradiated chickens—ALM and PETERSON (Chicago) 201
Angiotensin—Characteristics of angiotensin I converting enzyme from lung of dog—BAKHLE and REYNARD (London) NB187
—New view of cross-reactions in antisera—GIESE, NIELSEN and JØRGENSEN (Glostrup Hospital, Copenhagen) . . . NB189
Animal viruses—Leukaemic viruses act as helpers for spleen focus-forming virus—ECKNER and STEEVES (Roswell Park Memorial Institute) NB241
Antibodies—Impairment of response to malaria in rodents by antilymphocyte serum—BARKER and POWERS (US National Institutes of Health) . 429
Antibody synthesis—Enhanced by irradiation of spleen of pre-immunized rats—SIMIC and PETROVIC (Belgrade) 263
Anti-lymphocyte serum—Preparation of highly radioactive bovine anti-mouse lymphocyte antibody — DRESSER (MRC, Mill Hill) 630
Antitumour agents — Actinomycin D activity on tumours—CURTIS and PERKINS (MRC) 198
L-**Asparaginase and Human Malignant Disease**—CROWTHER (St. Bartholomew's Hospital, London) . . 168
Australia antigen—RNA isolated from preparations from patients with Au antigenaemia—JÓZWIAK, KOŚCIELAK, MADALIŃSKI, BRZOSKO, NOWOSŁAWSKI and KŁOCZEWIAK (Warsaw) NB92
Autoimmunity—Ultrastructural localization of pemphigus antibodies in epidermis—WOLFF and SCHREINER (Vienna) 59

Bacterial cells—Salt induces changes in turbidity and volume of *E. coli*—KNOWLES (Kent) . . NB54
Bacterial infection—Antigenic components of a new heptavalent *Pseudomonas* vaccine — HANESSIAN, REGAN, WATSON and HASKELL (Parke-Davis) NB209
Bacteriology—Autolytic enzymes involved in growth—FORSBERG and ROGERS (MRC, London) . . 272
Biochemical embryology—Induction of acetylcholinesterase activity in mouse neuroblastoma tissue culture cells—KATES, WINTERTON and SCHLESSINGER (Colorado) . 345
Blood cells—Reduction of methaemoglobin catalysed by erythrocyte cytochrome b_5 and cytochrome b_5 reductase—HULTQUIST and PASSON (Michigan) NB252
Blood groups—Xg^a antigen less common in Thais than Europeans—RATANAUBOL and RATANASIRIVANICH (Bangkok) . . . 430
Bone—Control of growth in rats—KEMBER and WALKER (London) 428
Brain biochemistry—Tryptophan increased by treatment with drugs which stimulate synthesis of serotonin—TAGLIAMONTE, TAGLIAMONTE, PEREZ-CRUET and GESSA (US National Institutes of Health) . NB125
Breast cancer—Cross-antigenic relationship between mouse and human tumour viruses—CHARNEY and MOORE (Institute for Medical Research, NJ) 627

Calcium absorption—Effect of artificial lighting in the elderly—NEER, DAVIS, WALCOTT, KOSKI, SCHEPIS, TAYLOR, THORINGTON and WURTMAN (Massachusetts General Hospital) 255
Cancer—Association with specific chromosome anomaly—MULDAL, ELEJALDE and HARVEY (Christie Hospital, Manchester) 48
—Mitochondrial DNA synthesis induced by polymoma virus—VESCO (CNR, Rome) and BASILICO (New York) 336
—Effect of oncogenic and non-oncogenic derivatives of 4-nitroquinoline 1-oxide on DNA repair synthesis—STICH, SAN (British Columbia) and KAWAZOE (Tokyo) . . 416
—Search for a human breast cancer virus—MOORE, CHARNEY, KRAMARSKY, LASFARGUES, SARKAR (Institute for Medical Research, NJ), BRENNAN, BURROWS (Michigan Cancer Foundation), SIRSAT, PAYMASTER and VAIDYA (Tata Memorial Center, Bombay) . 611
—*In vitro* assay of leucocyte migration inhibitory factor—WOLBERG and GOELZER (Wisconsin) . 632
Cathepsins—Inhibition of Yoshida ascites sarcoma growth in rats—ALLEGRETTI, ANDREIS (Zagreb), KOPITAR and LEBEZ (Ljubljana) NB180
Cell culture—New way of obtaining synchronized populations grown in suspension culture — SHALL and McCLELLAND (Sussex) . . NB59
Cell fusion—Hybrids and heterokaryons from fusion of enucleated and nucleated cells—POSTE and REEVE (London) NB123
Cell hybridization—Hybrids between human and mosquito cells induced by ultraviolet-inactivated Sendai virus—ZEPP, CONOVER, HIRSCHHORN and HODES (Mount Sinai) . NB119
Cell-mediated immunity—Lentinan as an immuno-accelerator—MAEDA and CHIHARA (National Cancer Centre, Tokyo) 634
Cellulose—Initiation of chain growth—MANLEY, JONKER, COOPER and POUND (McGill) . . . NB88
Cerebral cortex—Localization of ^{3}H-GABA by electron microscopic autoradiography—BLOOM and IVERSEN (Cambridge) 628
Cholera—Toxin stimulates intestinal adenyl cyclase—SHARP and HYNIE (Massachusetts General Hospital) . 266
Choline acetyltransferase — Multiple forms in rat brain—MALTHE-SØRENSEN and FONNUM (Norwegian Defence Research Establishment) NB127
Cholinergic receptors—Isolation of membrane protein to which toxin binds in electric tissue of *Torpedo*—MILEDI, MOLINOFF and POTTER (London) 554
Chromosomes—Isolabelling not incompatible with single stranded model—COMINGS (Hope Medical Centre) NB24
—Univalents segregate on separate spindle at meiosis—FORD (Sydney) 570
Collagen—Previously undetected long spacing form—ARMITAGE and CHAPMAN (Manchester) . NB151
—Possible *in vivo* mechanism for assembly of triple helix—SPEAKMAN (Leeds) 241

Contraceptive steroids—Progestogens can cause rupture of the aorta in hamsters—COBB, BLOOM, ROE and MACKENZIE (Chester Beatty) . . 50
Control of Transcription in Bacteria—TRAVERS (MRC, Cambridge) NB69
Cornea—Renewal of epithelium from pericorneal papillar structure—DAVANGER and EVENSEN (Makerere) 560

L-dopa—Possible new metabolites mediating its action—SOURKES (McGill) 413
—Therapeutic implications of formation of *m*-tyramine—SANDLER, GOODWIN, RUTHVEN (Queen Charlotte's Maternity Hospital, London) and CALNE (Royal Postgraduate Medical School, London) 414
Drugs—Excretion of *p*-methoxyamphetamine by humans—SCHWEITZER, FRIEDHOFF, ANGRIST and GERSHON (New York) 133
—L-dopa induces hypomania in manic depressives—MURPHY, BRODIE, GOODWIN and BUNNEY (US National Institutes of Health) . 135
—Hypnotics and hangover effects—WALTERS and LADER (London) 637
Drug addiction—Methadone antidote increases mouse brain serotonin—BOWES and KLEBER (Yale) . 134
Drug testing—A possible experimental artefact—McARTHUR, DAWKINS and SMITH (Kings College Hospital, London) 66

Encephalitogenic protein—Amino-acids sequenced and neuroceptor role suggested—CARNEGIE (Melbourne) . 25
—Metabolic activity of myelin basic protein of rat brain—WOOD and KING (Emory) . 56
Enterosecretory proteins—Relationships between secreted proteins of vertebrates—ADELSON (Harvard) . 321
Enzyme induction—α-Glucosidase in Mycoplasmatales—SLATER and FOLSOME (Hawaii) . . NB117

Graft immunology—Activated initiator cells resistant to hydrocortisone when responding to H2 antigens—COHEN and CLAMAN (Colorado) . . 274

Haematology—Effect of prostaglandin E_1 on clot retraction—MÜRER (Oslo) 112
Haemoglobin—Regulation of oxygen affinity by diphosphoglycerate—HAMASAKI, MINAKAMI and AONO (Kyushu) NB215
Haemoglobin genetics—Polymorphic alleles of the gene for the β-chain—GALIZZI (Johns Hopkins) . NB142
—Specific synthesis by allelic genes in human heterozygotes—ESAN, ADESINA and LUZZATTO (Ibadan) . . NB143
—Evidence for duplication of γ-chain locus in *Macaca nemestrina*—NUTE and STAMATOYANNOPOULOS (Washington) NB145
Histones—Proton magnetic resonance studies of interactions with DNA—BOUBLIK, BRADBURY, CRANE-ROBINSON and RATTLE (Portsmouth Polytechnic) . . . NB149
—Heterogeneity and polymorphism in chicken erythrocyte fraction V—GREENAWAY and MURRAY (Edinburgh) NB233
Human chromosomes—Distinguishing spermatozoa by fluorescence and DNA content—SUMNER, ROBINSON and EVANS (MRC, Edinburgh) NB231

Immune response—Antigen binding cells in embryonic chicken bursa and thymus—DWYER and WARNER (Melbourne) NB210
—Clustering of lymphoid cells round macrophages and blast cells during antibody formation—SULITZEANU, KLEINMAN, BENEZRA and GERY (Hebrew University) NB254
Immunoglobulins—IgG subclass specificity of human monocyte receptor sites—HUBER, DOUGLAS, NUSBACHER, KOCHWA and ROSENFIELD (Mount Sinai School of Medicine) . 419
Immunology—Depression of circulating interferon by anti-lymphocyte serum is a function of the inducer—DE MAEYER GUIGNARD and DE MAEYER (Orsay) . . NB212
—Lymphocytes stimulated to inhibit macrophage migration—LAMELIN and VASSALLI (Geneva) 426
—Private and public H-2 antigens of mice—KLEIN (Michigan) 635

Leukaemia — Prolonged erythroblast generation time—HUBER, HUBER, SCHMALZL and BRAUN-STEINER (Innsbruck) 113
Lymphocytes—Stimulation by cells from normal and leukaemic lines—KNIGHT (New York University Medical Center), MOORE (Roswell Park Memorial Institute) and CLARKSON (Sloane-Kettering Institute) NB185
—Participation of θ-bearing cell in an *in vitro* assay of transplantation immunity—LONAI, CLARK and FELDMAN (Weizmann Institute of Science) 566

Membranes—Extent of protein penetration of lipid layer—FINEAN, BRAMLEY and COLEMAN (Birmingham) 114
Memory—Selective neurone death theory—DAWKINS (Oxford) 118
Mixed leucocyte reaction—Impairment when leucocytes from multiple sclerosis patients are used—KÄLLÉN and NILSSON (Lund) . . . NB91
MLV—Method of detection and quantitation of murine leukaemia viruses—BASSIN, TUTTLE and FISCHINGER (US National Institutes of Health) 564
Muscle—Light microscopic examination of the effects of sugars and mineral ions on fast fibres of frog—KROLENKO (Academy of Sciences of the USSR) 424
—Role of electrostatic and dispersion forces—MILLER and WOODHEAD-GALLOWAY (Oxford) . 470
Muscular dystrophy—Denervation in murine dystrophy—HARRIS and WILSON (Newcastle) . . . 61
—Transplantation of dystrophic muscles suggests that the disease sometimes originates within the nervous system—SALAFSKY (Illinois) 270
Mycoplasma virus—Examination of agent infecting *M. laidlawii*—GOURLAY, BRUCE and GARWES (ARC, Newbury) NB118

Nerve terminals—Lanthanum ions block calcium release—MILEDI (London) 410
Neuropharmacology—Noradrenaline and chemical coding of hypothalamic neurones—KREBS and BINDRA (McGill) NB178
Neurophysiology—Effects of batrachotoxin on nerve membrane potential and conductances — NARAHASHI, DEGUCHI (North Carolina) and ALBUQUERQUE (Buffalo) . NB222

Nucleic acids—Double stranded RNA from rat liver homologous with the cellular genome—HAREL (Villejuif) and MONTAGNIER (Orsay) . NB106
—Double stranded RNA from liver induces interferon in rat cells—DE MAEYER, DE MAEYER-GUIGNARD and MONTAGNIER (Orsay) NB109
—Sequence of 6S RNA of *E. coli*—BROWNLEE (MRC, Cambridge) NB147

Obstetric analgesics—Pethidine and chlorpromazine metabolized by human neonates—O'DONOGHUE (Rotunda Hospital, Dublin) 124
Origin of Satellite DNA—WALKER (MRC, Edinburgh) 306
Ozone—Inhibits bactericidal activity of mouse lung—GOLDSTEIN, TYLER, HOEPRICH and EAGLE (California) 262

Penicillium—Lytic plaques produced by viruses—BORRÉ, MORGANTINI, ORTALI and TONOLO (Rome) . 568
Pesticides—DDT makes frog tadpoles hyperactive and then more open to predation by newts—COOKE (Monks Wood Experimental Station) . . 275
Plague—Host-specificity of *Pasteurella pestis* from Brazilian focus—BURROW and GILLETT (Porton Down) 51
—Toxins labelled with ^{75}Se-methionine—LEON, KADIS and KOLLMANN (Albert Einstein Medical Center, Philadelphia) . . . 120
Prostaglandin—Difference in haemodynamic response to prostaglandins A and E—KANNEGIESSER and LEE (St. Louis) 498
—$F_{2\alpha}$ induces lactogenesis and abortion in pregnant rats—DEIS (Cordoba) 568
Psychotomimetics—Psychotropic potency of methoxy-amphetamines and their inhibition of normetanephrine uptake—HENDLEY and SNYDER (Johns Hopkins) 264

Radiation damage—Removal of bases from nucleic acid after X-ray treatment—HARIHARAN and CERUTTI (Princeton) NB247
Regulation mutants—Analysis of *ade*12 *pur* 1 system in yeast suggests adenylosuccinate synthetase as a regulatory enzyme — LOMAX and WOODS (Sheffield) NB116
Retina—Differential response of ganglion cells to images in or out of focus—IKEDA (London) and HILL (Ohio State) 557
Retinal pigments—Implications of torsional potential of isomers for visual excitation—HONIG and KARPLUS (Harvard) 559
Reverse transcriptases—Enzymes similar to those of mouse leukaemia virus present in normal human and mouse cells — SCOLNICK, AARONSON, TODARO and PARKS (US National Institutes of Health) . . . 318
Rhodopsin—Sedimentation of micelles formed with digitonin—INCARDONA, MILES and BAKER (Florida State) NB250
Rifampicin—Antiviral effect on vaccinia in volunteers—MOSHKOWITZ, GOLDBLUM and HELLER (Jerusalem) 422

Scrapie—Infected brain tissue cultures grow more rapidly—CASPARY, BELL and COWSHALL (MRC, Newcastle) 269
Sex chromosomes—Early replication patterns in cattle—GUSTAVSSON (Royal Veterinary College, Stockholm) 339

Sleep—Correlation between concentrations of testosterone and rapid eye movement sleep—EVANS, MacLEAN, ISMAIL and LOVE (Edinburgh) 261
Structure of chromatin—Reactivity of DNA—CLARK and FELSENFELD (US National Institutes of Health) NB101

Tetracycline resistance—Evidence from mutant *E. coli* suggests that resistance carried by wild type R factor is inducible—FRANKLIN and COOK (ICI Limited) 273
Thymus lymphocyte heterogeneity—Evidence for a mature subpopulation in mouse thymus—RAFF (MRC, London) NB182
Toxicology—Isolation and proof of structure of wildfire toxin—STEWART (US National Institutes of Health) 172
Tumour viruses — RNAase-resistant nucleic acid of cells transformed with RSV — REDDI (Rockefeller University) NB25
—Effects of rifampicin and actinomycin D on DNA polymerase—GURGO, RAY, THIRY and GREEN (St. Louis) . . NB111
—Differences between murine sarcoma virus passaged in hamster cells *in vitro* and *in vivo*—KELLOFF, HUEBNER (US National Cancer Institute), CHANG, OROSZLAN and GILDEN (Flow Laboratories Inc.) NB155

Vaccination—BCG vaccine confers resistance to Friend disease virus in mice—LARSON, USHIJIMA, FLOREY, BAKER and BAKER (Montana) NB243
Viral envelopes—Glycoprotein found in the spikes of the membrane of Sindbis—COMPANS (Rockefeller) . NB114
Viral immunology—Bovine enterovirus shares antigen with polio virus—NATH, BALAYA and MOHAPATRA (All India Institute of Medical Sciences) 342
Virology—Newcastle disease virus induces cell fusion in the absence of RNA synthesis—REEVE and POSTE (London) NB157
—RNA dependent DNA polymerase in visna virus—STONE, SCOLNICK, TAKEMOTO and AARONSON (US National Institutes of Health) 257
—RNA dependent DNA polymerase in primate syncytium-forming viruses—PARKS, TODARO, SCOLNICK and AARONSON (US National Institutes of Health) 258
Vision—Source of cortical evoked potential components located by recording from human scalp—JEFFREYS (Keele) 502
—Estimating the time of juncture of an object with an observer—WEINBERGER (National Physical Laboratory of Israel) 562
Visual pigment—Linkage of retinal to opsin—ANDERSON (Baylor), HOFFMAN and HALL (California) NB249

PHYSICS

Atomic packing—Minimum energy clusters with Lennard-Jones potential—BURTON (Columbia) . . . 335
Bimolecular Homolytic Substitution at a Metal Atom—DAVIES and ROBERTS (London) PS221

Density functions—Statistical estimation of derivatives—BARTLETT and MACDONALD (Oxford) . PS126
Doppler velocity—Measurements using white light—SCHWAR (London) . 621
Drag—Clusters of submicron spheres in gravitational and electrical fields—MEGAW and WELLS (AERE, Harwell) 624

Electrons—Cyclic delocalization in molecules analysed—MAGNUSSON (Avondale College, NSW) . PS167
Experimental Programme at the CERN Intersecting Storage Rings—JENTSCHKE (Deutsches Elektronen-Synchrotron) PS133

Field Reversal or Self-Reversal?—SMITH (Open University) 378
Flash photolysis—Reactions involved in photolysis of dimethyl ketene—NG, LIM and NORRISH (Cambridge) PS42
Fluid flow—More about drag reduction by polymer additives—BELOKON and KALASHNIKOV (USSR Academy of Sciences) PS55

Gas breakdown—Classical prediction of laser threshold field—ZERNIK (Princeton) PS46
General relativity—Interaction of gravitational and electromagnetic fields reconsidered—REINHARDT (Bonn) . 36
—Reply to Reinhardt—WOODWARD and YOURGRAU (Denver) 36
—Scattering of gravitational waves—KHAN and PENROSE (London) 185
Geometries of coordinated ligands—MINGOS (Sussex) . . PS193
Glass surface cracks—Hertzian fracture data and a new analytical method—POLONIECKI and WILSHAW (Sussex) PS226
Gravitational radiation—Possible new means of detection—ANDERSON (Uppsala) 547
Gravitational waves—Detectors that distinguish between scalar and tensor radiation—DOUGLASS (Rochester) and TYSON (Bell Telephone Laboratories, Murray Hill) . . . 34

Hardness—Deformation of asperities—THOMAS, UPPAL and PROBERT (University College, Swansea) . PS86
Holophones—Collisionless plasma can record electrical signals and subsequently play them back—WATSON (UKAEA, Abingdon) . . . 28

Interferometry—Microtopographical interference pattern described by Goethe TOLANSKY (London) . . . 248

Materials science—Critical resolved shear stress for [001] slip in polyethylene—BOWDEN and YOUNG (Cambridge) PS23
Masers—Frequency of the hydrogen maser—ESSEN, DONALDSON, BANGHAM and HOPE (NPL) . 110
Metallurgy—Void lattice in molybdenum EVANS (AERE, Harwell) . . 403

Neutron diffraction—Analysis by a piezoelectric resonator — ENGLEHART and JACOBS (Pennsylvania State) . 111
New element—Possible evidence for element 112—MARINOV, BATTY, KILVINGTON (Rutherford High Energy Laboratory), NEWTON, ROBINSON (Manchester) and HEMINGWAY (Universities Research Reactor) 464

Plasma physics—Diffusion driven plasma currents and bootstrap Tokamak—BICKERTON, CONNOR and TAYLOR (UKAEA) . . . PS110

Quantum electrodynamics—Development of *S*-matrix approach—DAVIES (Cambridge) PS20

Relativity—Behaviour of moving terrestrial clocks—SCHLEGEL (Michigan State) PS237
—Reply to Schlegel—HAFELE (St Louis) PS238
—Energy levels and Lorentz invariance—LANDSBERG and HINDMARSH (University College, Cardiff) 332
Relaxation functions—Simple electronic technique for their determination—EGGERS (Max-Planck Institut, Göttingen) PS89

Seawater—Diffusion coefficient of silica in seawater—WOLLAST (Brussels) and GARRELS (Scripps) . PS94
—New laboratory method for measuring density — KREMLING (Kiel Institute for Marine Research) . 109
Soil creep—Formation of shear surfaces in low gradient slopes—CHANDLER and POOK (London) . . . 399
Solids—Instrument to measure fracture behaviour—WILSHAW and ROTHWELL (Sussex) . . . PS155
Steel coatings—Vonsenite in oxide scales on iron—ROLLS and SHAW (Manchester) 192
Surface sediments—Molybdenum and uranium concentrations along ocean ridge systems—TUREKIAN and BERTINE (Yale) 250
Symbolic logic—Mathematical approach to the prediction of scientific discovery—GOFFMAN (Case Western Reserve) and HARMON (Texas) . . 103

Thin films—Simultaneous measurement of refractive index and thickness—ISRAELACHVILI (Cambridge) PS85

VLF radio waves—Complex theory for ion cyclotron whistlers—TERRY (Cambridge) PS200

PSYCHOLOGY

Animal behaviour—Posterior buccal and subfrontal lobes essential for "reject" reflex in *Octopus*—ALTMAN (London) 204
—Independent circadian rhythms control drinking and eating—OATLEY (Sussex) . . . 494

Behaviour—Chemical stimulation of aggression in rats at midbrain and hypothalamus—BANDLER (Yale) NB223

Cycles in Social Behaviour—YOUNG (Institute of Community Studies) and ZIMAN (Bristol) 91

Divergent thinking—Poor performance of science students—RUMP and DUNN (Adelaide) 349

Handedness—Relationship with birth order—BAKAN (Michigan State) . 195

Imprinting—Young deer respond socially to dummies carrying scent of other species—MÜLLER-SCHWARZE and MÜLLER-SCHWARZE (Utah) . 55
—Effects on uracil incorporation into brain RNA in the "split-brain" chick — HORN, HORN, BATESON (Cambridge) and ROSE (Open University) 131

Learning—Incorporation of uridine into mouse brain during extinction—COLEMAN, WILSON and GLASSMAN (North Carolina) . . . 54

Menstrual cycle—Synchrony among women in a dormitory—McCLINTOCK (Harvard) 244

Psychopharmacology—ACTH administered during acquisition of a learned response blocks its effect on extinction —GRAY (Oxford) 52

Visual preferences—For colour and brightness in rhesus monkeys—HUMPHREY (Oxford) 615

TECHNOLOGY

Ceramics—Tough silicon nitride composites—LINDLEY and GODFREY (Admiralty Materials Laboratory) . 192

Corrosion—A product of the corrosion of zinc in concrete—SCHWICK (Brunswick), DIEHL and CARPENTIER (Freiburg) . . . PS184

Cryology—Cu(II) porphine may be useful in magnetic cooling experiments—COWEN, FAIRALL and WORTHY (Michigan State) . . . PS244

Dowsing Experiments—FOULKES (Institute for Industrial Research and Standards, Dublin) 164

Fibres—Row nucleation in pyrolysed polyacrylonitrile fibres — TYSON (Rolls-Royce) . . . PS121

Planning Complex Building Systems—ENGLAND (London) . . . 233

Polymers—Electrical resistivity of polymer insulations—KUSY and TURNER (Drexel University, Philadelphia) PS58

Pottery—Examination by Mössbauer spectroscopy—GANGAS, KOSTIKAS and SIMOPOULOS (University of Ioannina, Athens) and VOCOTOPOULOU (Archaeological Service of Ioannina) 485

Tribology—Mechanism of iodine lubrication — OWENS and ROBERTS (General Electric) . . . PS183

Wood—Behaviour under tensile axial strain—PAGE, EL-HOSSEINY and WINKLER (Pulp and Paper Research Institute of Canada) . . . 252

ZOOLOGY

Ageing—Lifespan of *Drosophila* lengthened by increasing duration of larval development—LINTS and LINTS (Louvain) NB86
—Ethoxyquin increases longevity of C3H mice—COMFORT, YOUHOTSKY-GORE and PATHMANATHAN (MRC, London) . . 254

Ageing of Mammals—BULLOUGH (London) 608

Axons—Uptake of protein by giant squid axon—GIUDITTA, D'UDINE and PEPE (International Institute of Genetics and Biophysics, Naples) . NB29

Ciliates—*Vorticella* contracts by means of a reversible mechanochemical cycle —AMOS (Cambridge) 127

Cricket song—Patterned response in a central neurone—ZARETSKY (California) 195

Development—Muscle cells cultured in the presence of cytochalasin B—SANGER (Pennsylvania), HOLTZER and HOLTZER (MRC, Cambridge) NB121
—DNA synthesis in chick embryonic skin as a function of age—ROTHBERG and EKEL (US National Institutes of Health) . . 341

Dinosaurs—Were brontosaurs land animals?—BAKKER (Yale) . . 170

Dryopithecus—Forelimb bones indicate affinity with hominoids and not with cercopithecoids — PILBEAM and SIMONS (Yale) 406

Embryology—ATP and ADP in rabbit blastocysts—BROOKS and LUTWAK-MANN (ARC, Cambridge) . 202

Experimental embryology—Human blastocysts grown in culture—STEPTOE, EDWARDS and PURDY (Cambridge) 132
—Human blastocyst grown *in vitro* in ovulation cervical mucus—SHETTLES (Columbia) 343
—Hamster spermatozoa capacitated by β-glucuronidase—GWATKIN and HUTCHISON (Merck Institute for Therapeutic Research) 343

Fingerprints—Detection with $^{35}SO_2$—SPEDDING (Auckland) . . . 123

Fisheries research—Acoustic tag for tracking fish—GREER, WALKER, MITSON and STORETON-WEST (MAFF Fisheries Laboratory) . . 197

Fog—Echolocation by bats—PYE (London) 572

Glycoproteins—Genetic variation of connective tissue of twins—SRINIVASAN, RADHAKRISHNA-MURTHY, PARGAONKAR and BERENSON (Louisiana) 58

Human ear wax—Implications of lysozyme and immunoglobulins—PETRAKIS, DOHERTY, LEE, SMITH and PAGE (California) 119

Indian *Hipparion*—First appearance may have been in the Nagri and not the Chingi deposits—SIMONS, PILBEAM and BOYER (Yale) . . 408

Insect hormone—Juvenile hormone from silk moth is not toxic to mice—SIDDALL and SLADE (Zoecon Corporation) NB158

LSD—Modification of response of cells in the lateral geniculate of cat—McKAY and HORN (Cambridge) . 347

Mosquitoes—Pupae escape from the surface of the water by moving their spiracles—HOULIHAN (Aberdeen) . 489

Mycoplasmas—Smallest viable organisms may be larger than filtration experiments have suggested—LEMCKE (Lister Institute) . . 492

Neanderthals—Geography not rickets can account for morphology—MAYR (Harvard) and CAMPBELL (Cambridge) 253
—Did syphilis cause bone changes?—WRIGHT (London) . 409

Parturition—Onset may be induced by an increase in circulating oestrogens in sheep—CHALLIS (ARC, Cambridge) 208

Placenta—No adrenergic nerves found —WALKER (Monash) and McCLEAN (Melbourne) . . . 344

Predation—Octopuses will attack motionless prey—WODINSKY (Brandeis) 493

Proprioceptors—Transduction processes of movement and position sensitive cells in a crustacean limb—MILL and LOWE (Leeds) 206

Reproduction—Uterine changes during capacitation in hamster—LAKSHAM (Laurentian University) . . . 49

Schistosome granulomas—New model using soluble egg antigen and bentonite particles—VON LICHTENBERG, SMITH, LUCIA and DOUGHTY (Harvard and Mississippi) 199
—Specific hypersensitivity elicited by bentonite particles coated with soluble antigens from schistosome eggs and tubercle bacilli—BOROS and WARREN (Case Western Reserve) 200

Serotonin—Inhibition of spontaneous ovulation in rats—LABHSETWAR (ICI) 203

Slugs—Overlapping generations found in field studies—HUNTER (Department of Education and Science) and SYMONDS (National Agricultural Advisory Service) 349

Uses of Artificial Insemination—JONES (Zoological Society of London) . 534

Weight regulation—Sensory feedback in regulation of body weight—CABANAC, DUCLAUX and SPECTOR (Lyon) 126

Zoology—"New" sense organ in primitive gastropods—SZAL (Hopkins Marine Station) 490

INDEX

CONTENTS OF VOLUME 230

Nature, pp. 1–608. *Nature Physical Science* (PS), pp. 1–200. *Nature New Biology* (NB), pp. 1–288

ARCHAEOLOGY AND PALAEONTOLOGY

Australopithecines—The new composite cranium from Swartkrans is australopithecine—WOLPOFF (Case Western Reserve) 398

Fossils—Lower Himalayas not as barren as previously thought—PATWARDHAN and AHLUWALIA (Panjab) . 451

Fossils—Monochloracetic acid and conodonts — a warning — ZIEGLER, LINDSTROM and McTAVISH (Philipps-Universitat) 585

Ostracods—Phosphatized ostracods with appendages from Brazilian Cretaceous —BATE (British Museum (Natural History)) 397

Primate skull—New reconstruction for *Plesiadapis tricuspidens*—SZALAY (American Museum of Natural History) 324

Vale of Clwyd—New radiocarbon dating of cave contents — ROWLANDS (Ethel Wormald College, Liverpool) . PS9

ASTRONOMY AND ASTROPHYSICS

Antimatter—Search among high energy cosmic rays — GREENHILL, CLARKE and ELLIOT (London) . 170

Apollo 11—Lunar samples do not inhibit growth of terrestrial microorganisms —SILVERMAN, MUNOZ and OYAMA (NASA) 169

Binary stars—Ways to study collapsars and neutron stars—WOOLF (Minnesota) 39

Cosmic infrared sources—Interaction of cosmic rays with interstellar dust—WICKRAMASINGHE (Cambridge) PS166

CP 0328—Observations with the Westerbork telescope—COLE (Leiden) and WEILER (Westerbork) . . PS114

Crab nebula—Predictions of the wavefield theory for the output of the nebula—REES (Cambridge) . . PS55

Crab Nebula—Search for circular polarization—LANDSTREET (Western Ontario) and ANGEL (Columbia) . 103

Crab Nebula—Structure of magnetic field around pulsar—SCARGLE (California) PS37

ε Aurigae—Is there a black hole?—DEMARQUE (Yale) and MORRIS (Dominion Astrophysical Observatory) 516

Eigen vibrations—Observation of Earth eigen vibrations possibly excited by gravity waves—TUMAN (Stanislaus College, California) . . PS101

Galactic nucleosynthesis—Detonation in supernova explosions — DELANO (Yeshiva) PS53

Galactic X-rays—Do they come from low luminosity discrete sources ?—HUDSON, PETERSON and SCHWARTZ (California) . . 177

Gravitational waves—Effect on evolution of binary WZ Sge—VILA (Pennsylvania) PS39

Interstellar dust—More evidence for minerals containing Fe^{3+} — MANNING (Canada Department of Energy, Mines and Resources) . PS131

Interstellar dust—Reply to Duley—WICKRAMASINGHE (Cambridge) and NANDY (Royal Observatory, Edinburgh) PS24

Interstellar dust—Theoretical model for polarization around the 4430 band—GREENBERG (New York) and STOECKLY (Rensselaer Polytechnic Institute) PS15

Interstellar dust—Enstatite grains not responsible for 2200 Å extinction feature — WICKRAMASINGHE (Cambridge) and NANDY (Royal Observatory, Edinburgh) . PS16

Interstellar grains—Chemisorption and hydrogen recombination—BRECHER and ARRHENIUS (California) PS107

Interstellar reddening—Features in spectrum of the most heavily reddened star known—BROMAGE (Edinburgh) . 172

Jupiter—A new approach to the determination of H_2: He ratio involving occultation — BRINKMANN (Kitt Peak National Observatory) . . 515

Large Steerable Radio Telescope at Ootacamund, India—SWARUP, SARMA, JOSHI, KAPAHI, BAGRI, DAMLE, ANANTHAKRISHNAN, BALASUBRAMANIAN, BHAVE and SINHA (Tata Institute, Bombay) PS185

Maffei I—No radio emission at 1415 MHz detected at Westerbork—OORT (Leiden) 103

Microwave astronomy—Nature of emission feature at 11.7 cm^{-1}—BEERY, MARTIN, NOLT and WOOD (Hawaii) PS36

Murchison meteorite—Inorganic composition and possible subtype classification—LOVERING, LE MAITRE (Melbourne) and CHAPPELL (Australian National) . . . PS18
Murchison meteorite—Origin of amino-acids—ORÓ, GIBERT, LICHTENSTEIN, WIKSTROM and FLORY (Houston) 105

Planetology—Mechanism for the formation of shatter cones—SYME GASH (Lancaster) PS32
Primordial silicates—Iron trapping in protosilicates—KERRIDGE (NASA)PS66

Quasar variations—Correlation between optical fluctuation and radio spectrum—FOLSOM, SMITH, HACKNEY and HACKNEY (Florida) . PS199

Radio astronomy—Comments on the Ohio source counts—HARRIS and KRAUS (Ohio State) . . PS140
Rare gases — Relationships between abundance pattern and isotope anomalies — KURODA, REYNOLDS, SAKAMOTO and MILLER (Arkansas) PS42
Redshifts—Review of their anomalous nature—LEWIS (Stockport) . PS13

Sco X-1—Upper limit to flux density at 408 MHz—JAUNCEY (Cornell) PS200
Solar corona—Is it heated by neutrons?—FOWLER and HASHEMI (Oklahoma) 518
Solar system—Observed abundance distribution of chemical elements as a test of Alfvén's theory of its origin—HAUGE (Oslo) 39
Solar system—Temperature of the Sun during its early history—KURODA (Arkansas) PS40

Ucera meteorite—Not symmetrical within parent meteoroid—VAZ (Instituto Venezolano de Investigaciones Cientificas) PS23

X-ray astronomy—More data on variability of M87—JANES, POUNDS, RICKETTS (Leicester) and REES (Cambridge) PS188
X-ray background—A 44 Å line component ?—LAMPTON, GREEN and BOWYER (California) . . . 448

ATMOSPHERE

Atmosphere — Were internal gravity waves generated by total eclipse of March 7, 1970?—ARENDT (US Army Electronics Command) . PS89
Atmospheric tracers—Origin and movement of fluorine compounds—LOVELOCK (Reading) 379

F region—Abnormal latitudinal distributions of the critical frequency—FATKULLIN (USSR Academy of Sciences), MALHOTRA and AGGARWAL (National Physical Laboratory, New Delhi) PS171

Ice nucleus storms—Possible connexion with volcanic activity — HOBBS (Washington, Seattle), FULLERTON (Hawaii) and BLUHM (Washington, Seattle) PS90

Ionosphere—Effect of winds on Antarctic F region — ECCLES, KING and CHALLINOR (Radio and Space Research Station) PS198
Ionosphere—Origin of irregularities in the E region—PRAKASH GUPTA and SUBBARAYA (Physical Research Laboratory, Ahmedabad) . . PS170
Ionosphere—Riser whistlers at a ground station at low latitude—DIKSHIT, SOMAYAJULU and TANTRY (Banaras Hindu) PS115

Nuclear tests—Silver-108m at Bikini and Eniwetok—BEASLEY and HELD (Washington) 450

Radio pulses from air showers—Evidence for pulses at frequencies as low as 2 MHz—STUBBS (Adelaide) . PS172

Seismology—Deep sea photographs of active seismic fault—LE PICHON, AUZENDE, PAUTOT, MONTI and FRANCHETEAU (Centre Oceanologique de Bretagne) . . . 110
Stratosphere—Warming observed by Nimbus 4—BARNETT, HARWOOD, HOUGHTON, MORGAN, ROGERS, WILLIAMSON (Oxford), PECKHAM and SMITH (Heriot-Watt) 47

Venus—Composition of the clouds and the refractive index of aqueous HCl solutions—LEWIS (MIT). . . 295

Water dimers—Possible existence in atmosphere—GEBBIE, BOHLANDER and PARDOE (US National Bureau of Standards) . . . 521

CANCER, IMMUNOLOGY AND CELL BIOLOGY

Alloantigens—Linkage between mouse antigen loci—ITAKURA, HUTTON, BOYSE and OLD (Sloan-Kettering and Roche Institutes) . . NB126
Allografts—Tolerance may be mediated by serum-borne factors — HELLSTRÖM, HELLSTRÖM (Washington, Seattle) and ALLISON (Clinical Research Centre, Harrow) . . 49
Antibodies—Purification of human brain specific antibodies by affinity adsorption chromatography—TRIPATZIS, WARECKA and WONG (Lübeck) NB250
Antigens—Loss of epidermal antigens important in skin cancer—MULLER and SUTHERLAND (Monash) . 384
Anti-lymphocytic serum—Lack of anti-macrophage species specificity — HUGHES, NEWMAN, FIELD (MRC Demyelinating Diseases Unit) and WOODRUFF (MRC Research Group on Clinical and Experimental, Problems of Transplantation) . NB211
L-asparaginase—A rapid and sensitive assay—FROHWEIN, FRIEDMAN, REIZER and GROSSOWICZ (Hebrew University) NB158

Betel nut—Carcinogenic effect on hamster buccal pouch—SURI, GOLDMAN and WELLS (Boston) . . 383

Cancer—Evidence for DNA mammary tumour virus in mouse erythrocytes—NANDI (California) . . NB146

Carcinogens—Propylene imine and propane sultone induce tumours in rats—ULLAND, FINKELSTEIN (Bionetics Research Laboratories Limited) WEISBURGER, RICE and WEISBURGER (US National Institutes of Health) 460
Cell aggregation—Role of different sponge cell types when aggregation is species specific—JOHN, CAMPO (MRC, Edinburgh), MACKENZIE and KEMP (University College of Wales) NB126
Cell transformation—Effect of polycyclic hydrocarbons—DIPAOLO, DONOVAN and NELSON (US National Institutes of Health) . . NB240
Cellular protein—New theory of control of concentrations—FRITZ, WHITE, VESELL (Pennsylvania State) and PRUITT (Alabama) . . NB119
Chemotaxis—Role of galactose binding protein in *E. coli*—HAZELBAUER and ADLER (Wisconsin) . NB101
Cyclamates—Detection of cytogenetic damage to human leucocytes and Chinese hamster bone marrow—BREWEN, PEARSON, JONES and LUIPPOLD (Oak Ridge National Laboratory) NB15

Decidual cell reaction—Effects of maternal preimmunization—CLARKE and HETHERINGTON (Edinburgh) . 114
DNA—Synthesis apparently throughout meiosis—RILEY and BENNETT (Plant Breeding Institute, Cambridge) 182
Drosophila—Effect of maternal age on nucleic acid content in eggs—TSIEN and WATTIAUX (Louvain) . NB147

Erythroblasts—Two inducers of multiplication *in vitro*—BORSOOK, JIGGINS and WILSON (California) . 328

γ-Globulin—Differential inactivation of lymphocytes and bone marrow cells by heterologous anti-mouse γ-globulin serum—COLE and MAKI (Stanford) NB244
Glucagon—Antibodies in poly-L-lysine "responder" guinea-pigs—CUATRECASAS, ILLIANO and GREEN (US National Institutes of Health) . NB60

Hamster oncornaviruses — Serological identification — NOWINSKI, OLD, O'DONNELL and KINGSLEY SANDERS (Sloan-Kettering Institute) NB822
Histocompatibility—Major locus of Rhesus monkeys—BALNER, GABB, DERSIANT, VAN VREESWIJK and VAN ROOD (Radiobiological Institute TNO and Leiden) . . NB177
HL-A substances—Involvement of carbohydrate in the immunochemical determinant area — SANDERSON, CRESSWELL and WELSH (Queen Victoria Hospital, East Grinstead) NB8
Hybrid cells—Correction of genetic defects—SCHWARTZ, COOK and HARRIS (Oxford) . . . NB5

Immune receptor—Graft versus host reaction suppressed by univalent anti-Ig antibody — RIETHMULLER, RIEBER and SEEGER (Tübingen) NB248
Immune response—Genetic differences in reaction of mice to separate determinants on one bacterial antigen—CERNY, McALACK, SAJID and FRIEDMAN (Temple) . . NB247
Immune response—"Pre-emption" of immunity from pre-injection of foreign erythrocytes—O'TOOLE and DAVIES (Chester Beatty Research Institute, London) 177
Immunochemistry — Organization of histocompatibility genes—RYCHLIKOVA, DEMANT and IVANYI (Czechoslovak Academy of Sciences) NB271

Immunoglobulins—Hypervariable region of human heavy chains—CAPRA (Mount Sinai, New York) . NB62
Immunoglobulins—Genetic control of variable and constant regions of heavy chains — MAGE, YOUNG-COOPER and ALEXANDER (US National Institutes of Health) NB63
Immunoglobulins—19S and 7S antibodies of shark—SCHULKIND, ROBBINS and CLEM (Florida and Lerner Marine Laboratory) . . . NB182
Immunoglobulins—Synthesis of light chains *in vitro*—STAVNEZER and HUANG (Johns Hopkins) . NB172
Immunological tolerance—Induction by a hapten bound to a non-immunogenic protein carrier—BOREL (Tufts) NB180
Immunology—A marker antigen for lymphocytes derived from bone marrow—RAFF, NASE and MITCHISON (MRC, Mill Hill) . . . 50
Interferon—Production inhibited by heterologous normal serum—FRIEDMAN, BARTH and STERN (US National Institutes of Health) . NB17

Lens morphogenesis—Independence of initial crystallin synthesis and lens fibre formation — BRAVERMAN (Allegheny General Hospital) and KATOH (Mercy Hospital, Pittsburgh) 392
Lymphocytes—Cells from human subjects bind to sheep red blood cells—LAY, MENDES (São Paulo), BIANCO and NUSSENZWEIG (New York) 531
Lymphocytes—Effect of C reactive protein—HORNUNG and FRITCHI (Tulane) NB84
Lymphocytes — Induction in delayed hypersensitive human donors by specific antigen plus Epstein-Barr virus—BAUMAL, BLOOM and SCHARFF (Albert Einstein College of Medicine) NB20
Lymphocytes — Presence of thymus-derived cells in mouse thoracic duct lymph — MILLER and SPRENT (Melbourne) NB267

Macrophages—Activity and properties of migration inhibitory factor produced by mixed lymphocyte cultures—BARTFELD and ATOYNATAN (St Vincent's Hospital, New York) NB246
Mitochondria—Energy dependent accumulation of Ca^{2+} by cooperative interactions — BYGRAVE, REED and SPENCER (Australian National) NB89
Mitosis—Effect of methyl methanesulphonate on DNA synthesis—MYERS and STRAUSS (Chicago) NB143
Muscle—Changes in unscheduled DNA synthesis after differentiation — HAHN, KING and YANG (Stanford) NB242

Nerve cells—Separation of nerve cells by new centrifugation technique—SELLINGER, AZCURRA, JOHNSON, OHLSSON and LODIN (Michigan) NB253
Nuclear transplantation—Technique for *Drosophila melanogaster* — SCHUBIGER and SCHNEIDERMAN (California) 185

Tumorigenicity—A test using hamsters treated with antilymphocyte serum—WALLACE, VASINGTON (American Cyanamid Company) and PETRICCIANI (US National Institutes of Health) 454
Tumour cells—Antigenic heterogeneity in clonal cell populations induced by polyoma virus—NEGRONI and HUNTER (Imperial Cancer Research Fund) NB18
Tumours—Detailed diagnosis in bone by neutron radiography—BOYNE (California) and WHITTEMORE (Gulf General Atomic) 461

GENETICS, CHROMOSOMES AND EVOLUTION

Chromosomes—Regulation of meiotic pairing by chromosome 3*D* of *Triticum aestivum*—MELLO-SAMPAYO (Institute Gulbenkian de Ciência, Oeiras) NB22
Drosophila—Transient linkage disequilibrium in a laboratory population—O'BRIEN and MACINTYRE (Cornell) 335
Fibrinogen — Heterogeneity in man — GAFFNEY (MRC, Mill Hill) NB54
Genetic hazards—Test procedure for chemicals based on lethal mutations in mammals—EPSTEIN (Harvard and RÖHRBORN (Heidelberg) . 459
Genetic recombination—Roles of parental and progeny DNA in phage S13—BAKER, DONIGER and TESSMAN (Purdue) NB23
Hominoidea—Brachiation and evolution of early hominoids—LEWIS (London) 578
Karyotyping—New measurement and computer system for human and other cells — GILBERT and MULDAL (Christie Hospital, Manchester) NB203
Musicality—A test of the Lamarckian hypothesis on Welsh and English children—McLEISH (Alberta) and THOMAS (Cambridge) 337
Mutagenesis—Induction of mutations by nitrosoguanidine—GUEROLA, INGRAHAM and CERDÁ-OLMEDO (Seville) . . . NB122
Mutation—Induction by *y*-irradiation in various conditions—ALDERSON and SCOTT (MRC, Harwell) . NB45
Population size—Principle of competitive exclusion and *Drosophila*—BOROWSKY (New York) . . . 40
Retina—Patchy degeneration in tetraparental mice — WEGMANN, LAVAIL and SIDMAN (Harvard) . . 333
Sex chromosomes—Care needed when quinacrine fluorescence used to identify *Y*—BORGAONKAR and HOLLANDER (Johns Hopkins) . . 52
Sex chromosomes—Identification in amniotic fluid — ROOK, HSU GERTNER and HIRSCHHORN (Mount Sinai School of Medicine, New York) 53
Sex chromosomes—Quinacrine used to determine the sex of a foetus—SHETTLES (Presbyterian Hospital, New York) 52
Spermatocytes—Origin of apparent polyploids in the mouse—FORD and EVANS (MRC Radiobiology Unit, Harwell) 389
X-chromosome inactivation—Inheritance of glucose-6-phosphate dehydrogenase in kangaroos — RICHARDSON, CZUPPON (New South Wales) and SHARMAN (Macquarie) . NB154
X chromosome inactivation—Phosphoglycerate kinase polymorphism in kangaroos — COOPER, VANDEBERG (La Trobe), SHARMAN (Macquarie) and POOLE (CSIRO) NB155

GEOLOGY, GEOPHYSICS AND OCEANOGRAPHY

African Rift System—Age of Ethiopian flood basalt—REX (Leeds), GIBSON (London) and DAKIN (Haile Selassie I University) PS131
Amino-acids—Free amino-acids dissolved in the North Atlantic ocean—POCKLINGTON (Bedford Institute, Nova Scotia) 374

Carbonatites—Apparent periodicity of emplacement in Canada—MACINTYRE (Scottish Research Reactor Centre) PS79
Chondrite amino-acids—Evidence against extraterrestrial origin—ORÓ, NAKAPARKSIN, LICHTENSTEIN and GIL-AV (Houston) 107
Cornwall Devonian—Development of slaty cleavage — ROBERTS and SANDERSON (Newcastle upon Tyne) PS87
Cretaceous—Nature of the terminal event — WORSLEY (Washington, Seattle) 318

Deccan traps — Tertiary geomagnetic reversals—PAL, MADHAV and BHIMASANKARAM (Osmania) . PS133

Earth's crust—Convection plumes in the lower mantle—MORGAN (Princeton) 42
Ethiopian geology—Structure of the Pre-Cambrian in Ethiopia — KAZMIN (United Nations Ethiopian Survey) PS176

Geomagnetism—Observations in Canada during the solar eclipse of March 7, 1970—STENING, GUPTA and VAN BEEK (Canada Department of Energy, Mines and Resources) . PS22
Geophysical correlation functions—Correlations not significant?—KHAN (Hawaii) PS57
Geophysical correlation functions—Hide and Malin criticized—LOWES (Newcastle upon Tyne) . . . PS61
Geophysical correlation functions—Reply to Khan and Lowes—HIDE (Meteorological Office) and MALIN (Institute of Geological Sciences) . . PS63
Glaciation—Worldwide synchronicity of Late Precambrian glaciation unlikely—CRAWFORD (Australian National) and DAILY (Adelaide) . . 111

Ice Age—Radiocarbon chronology of deglaciation in western Scotland—PEACOCK (Institute of Geological Sciences, Edinburgh) . . PS43

Magnetic fields—Reversals of Earth's magnetic field—JACOBS (Alberta) . 574
Magnetic fields—Tidally induced variation over the British Isles—WINDLE, KENDALL and GRETTON (Sheffield) 296
Manganese nodules—Upper Devonian nodules reported from France—TUCKER (Reading) . . PS116

Oceanography—Flank crater on Union Seamount — SCHWARTZ (Western Washington State College), SCRIMGER, HALLIDAY and KELLY (Defence Research Establishment Pacific, BC) PS20

Permafrost—First report of existence in Japan—HIGUCHI and FUJII (Nagoya) 521
Pingos—Occurrence in southern Ireland—MITCHELL (Trinity College, Dublin) 43
Plate tectonics—A geologist's view of rifting in Africa—LE BAS (Leicester) PS85

Plate tectonics—Elevation as a guide to age across the South-west Indian Ridge—SCLATER (Scripps Institution) and HARRISON (Miami) . . 175

Recent sediment—Fatty acid variation with depth—FARRINGTON and QUINN (Rhode Island) . . PS67

Strontium—Glacial erosion as an explanation of the variable isotopic composition in sea water—ARMSTRONG (Yale) PS132

Volcanoes—Eruption clouds of Hekla—CADLE and BLIFFORD (US National Center for Atmospheric Research) 573
Volcanism—Evidence for Miocene volcanism in the North Sea—OFTEDAHL (Norges Tekniske Högskole, Trondheim) 109
Volcanism—First record of Eocene volcanics in south-east England—ELLIOTT (British Museum (Natural History)) PS9

Western Mediterranean—Evidence for an upper Miocene salt layer—AUZENDE, BONNIN, OLIVET, PAUTOT (Centre Océanologique de Bretagne) and MAUFFREY (Laboratoire de Géologie Dynamique) . . PS82

MATERIALS

Anomalous water—A silicic acid solution?—ADAMS, GABE, MANNING, WHITLOW, KINGHAM and SCOTT (Canada Department of Energy, Mines and Resources) . PS39

C2/c clinopyroxene—Anomalous Mössbauer spectra—WILLIAMS, BANCROFT (Western Ontario), BOWN (Cambridge) and TURNOCK (Manitoba) PS149
Carbon monoxide—Interaction with dicobalt octacarbonyl at high pressures and temperatures—WHYMAN (ICI) PS139
Chalcedony—Length-slow variety and sulphate evaporite minerals—PITTMAN and FOLK (Texas) . PS64
Chemistry—Solvent effects in the EPR spectra of oxidized nickel(II) tetraphenylporphyrin—RAYNOR (Leicester) PS179
Clays—Use of neutron spectroscopy to study water in clay minerals—HUNTER (Sydney), STIRLING and WHITE (Oxford) . . . PS192
Coordination geometry—Dioxygen, superoxo and peroxo complexes—MINGOS (Sussex) . . PS154
Crystallography—Swelling of montmorillonite in water—LOW, WHITE (Purdue) and RAVINA (Israel Institute of Technology) . . PS159

Ferrites—Infrared absorption spectra—GRIMES (Aston) and COLLETT (Wolverhampton Polytechnic) . PS158

Hydroxyapatite—Pure samples may be monoclinic—ELLIOTT (London) PS72

Ice—Importance of water component of impure ice—PAREN (Scott Polar Research Institute) and WALKER (Cambridge) PS77
Ice—Evidence of a liquid phase—BELL, MYATT and RICHARDS (Oxford) PS91
Ion diffusion—Hydroxyl ions in quartz—WHITE (Manchester) . . PS192

Kinetics—Propagation kinetics of steps growing on the basal plane of ice crystals—MICHAELI (Hebrew University of Jerusalem) . . PS117

Materials—Auger electron spectroscopy of graphite fibre surfaces—CONNELL (Northrop Corporate Laboratories) 377
Materials—Behaviour of oxide films on iron just before breakdown—McBEE and KRUGER (US National Bureau of Standards) PS194
Mineralogy—New method for synthesizing phases in the system AL_2O_3-H_2O—CHESWORTH (Guelph) . PS65
Mineralogy—Spinodal behaviour in an alkali feldspar—OWEN and McCONNELL (Cambridge) . . PS118

NMR—Interpretation of NMR studies on lyotropic liquid crystals—TIDDY (Unilever) PS136
NMR spectra—Structures of some dihalotriphenylphosphorus(V) compounds—DILLON and WADDINGTON (Durham) . . . PS158

Optical effect—Internal reflexion in a cubic crystal—FORNO and JONES (NPL) 375

Petrology—Clinopyroxene crystallization from a basic magma of alkaline affinity—GIBB (Manchester) . PS153
Polyacrylamide gels—Structures and properties investigated—RICHARDS and TEMPLE (MRC, London) PS92
Polymers—Effect of size and surface on creep—BENHAM and MALLON (Queen's University, Belfast) . PS45
Polymers—Dielectric loss in polyethylene terephthalate—HSU and KWAN (Chinese University of Hong Kong) PS46
Polymer membranes—Effect of *trans-cis* isomerization of a dye on membrane volume—VAN DER VEEN and PRINS (Syracuse, NY) . . PS70

Radiation chemistry—Light emission from the dissolution of gamma irradiated alkali halides in water—MITTAL (Bhabha Atomic Research Centre) PS160
Radiation—Pyrocarbon is extended by several thousand per cent after neutron and fission-fragment irradiation—VOICE (Dragon Project) . PS47

MEDICINE, BACTERIOLOGY AND PHARMACOLOGY

Antibiotics—Antiviral effect of constituent parts of the rifampicin molecule—FOLLETT and PENNINGTON (MRC, Glasgow) 117
Antibiotics—Pneumococci insensitive to penicillin—HANSMAN (Women's Hospital, Sydney), GLASGOW, STURT, DEVITT and DOUGLAS (Pneumonia Research Project, New Guinea) 406
Artificial kidneys—Hydrated polyphenylene oxide sulphonate ion exchange membranes for improved artificial kidneys—LACONTI, ENOS (General Electric) and COLTON (MIT) . . 388

Bacterial R factors—Coordination with sex pili—SALZMAN (Lister Institute) NB278
Bacteriology—A pure flagella suspension from *Clostridium chauvoei*—CHANDLER and GULASEK-HARAM (Commonwealth Serum Laboratories) 121
Blood sampling—Repeated tail snipping causes leucocytosis in mice—JYVÄSÄRVI, KEINÄNEN and RUUSKANEN (Turku) 122
Brain diseases—Two transmitted to four New World monkeys from man and chimpanzee—GAJDUSEK and GIBBS (US National Institutes of Health) 588

Cornea—Maintaining transparency after excision—RUBIN, POWERS, HOPKINS, STENZEL (Cornell), DUNN (Roosevelt Hospital, NY) and MIYATA (Japan Leather Company) . 120

Dopamine—A new precursor—BARTHOLINI, KURUMA and PLETSCHER (Hoffmann-La Roche) . 533

Haemoflagellates—Mechanism of resistance to purified acriflavin in *Leishmania tarentolae*—STRAUSS (Rockefeller) NB49
Haemophilia—Immunology of factor VIII in haemophilia A—GRALNICK, ABRELL and BAGLEY (US National Institutes of Health) . . NB16
Homotransplantation—Replacement of rabbit joint cartilage with isolated epiphyseal and articular cartilage cells—BENTLEY (Oxford) and GREER (Pittsburgh) 385

Migraine—Tyramine conjugation defect—YOUDIM, BONHAM CARTER, SANDLER (Queen Charlotte's Maternity Hospital, London), HANNINGTON (The Wellcome Trust) and WILKINSON (Elizabeth Garrett Anderson Hospital, London) . . 127

Plasmids—Specificity of two conjugation proteins of *E. coli*—WILLETTS (Edinburgh) NB183

Scrapie—Histopathological similarity to cuprizone toxicity in mice—PATTISON and JEBBETT (ARC Institute for Research on Animal Diseases) . 115
Scrapie agent—Identification of an eclipse phase—FIELD, JOYCE and KEITH (Newcastle General Hospital) NB56

MOLECULAR BIOLOGY, VIROLOGY AND MOLECULAR STRUCTURE

Adenoviruses—Crystallization of human adenovirus type 5 fibre—MAUTNER and PEREIRA (MRC) 456
α-Amanitin—Facilitated hepatocyte penetration after conjugation with albumin and fluorescein—FIUME, CAMPADELLI-FIUME and WIELAND (Max-Planck Institut, Heidelberg) NB219
ATPase—Lipids required for Mg dependent activity stimulated by sodium and potassium—NOGUCHI and FREED (New York) . . NB148

Cell transformation—Action of 3-methylcholanthrene and Rauscher leukaemia virus on rat embryo cells—PRICE, FREEMAN (Microbiological Associates), LANE and HUEBNER (US National Institutes of Health) . NB144
Cell transformation—Virus specific RNA in cells transformed by RNA tumour viruses—GREEN, ROKUTANDA and ROKUTANDA (St Louis) NB229
Chemical rotation—Interaction between an amide nitrogen lone pair and a noncontiguous carbonyl carbon and its effect on amide rotation—PORTOGHESE and TURCOTTE (Minnesota) 457
Chromosome puffs—An *in vitro* model for studying mechanism of ecdysone and its analogues — ASHBURNER (Cambridge) NB222

DNA methylation—N^6-methyladenone in DNA of T2 phage and *E. coli* host —VANYUSHIN, BURYANOV and BELOZERSKY (Moscow State) NB25

Gene amplification — An alternative theory to explain the synthesis of *Xenopus* nucleoli—WALLACE (Birmingham), MORRAY and LANGRIDGE (Amherst College) . . 201

Haemoglobin — Nuclear magnetic resonance spectrum after binding to $^{17}O_2$—IRVING and LAPIDOT (Weizmann Institute of Science) . . NB224
Haemoglobin—Three dimensional structure of Rainier protein—GREER and PERUTZ (Cambridge) . . NB261
Haemoglobin—Structure of Rainier and Bethesda proteins—HAYASHI, STAMATOYANNOPOULOS YOSHIDA and ADAMSON (Washington) NB264
Herpes virus—Activation of a virus-like particle in lymphoid cell lines—Mc CORMICK, MUMFORD, STENBACK and TRENTIN (Baylor) NB83
Human growth hormone—A revised primary structure—NIALL (Massachusetts General Hospital) . . NB90
Hybrid cells—Synthesis of ribosomal RNA in mouse-hamster hybrids—STANNERS (Toronto), ELICEIRI (St Louis) and GREEN (MIT) NB52

Influenza virus—5′-Terminal nucleoside of RNA—YOUNG and CONTENT (California) 140
Interferon—Potentiation of antiviral activity by actinomycin D—CHANY, FOURNIER and ROUSSET (Hôpital Saint-Vincent-de-Paul, Paris) NB113
Interferon—Inhibition of initial stages of transformation by polyoma virus—TAYLOR-PAPADIMITRIOU and STOKER (Imperial Cancer Research Fund) NB114

Lactate dehydrogenase—Hybridization in physiological *in vitro* conditions—MILLAR, SUMMERS and NIZIOLEK (US National Naval Medical Center) NB117
Lactate dehydrogenase—Epigenetic control of subunit assembly—ROSENBERG (Yale) NB12
Lactose operon—Regulation of transcription *in vitro* by cyclic AMP receptor protein and *lac* repressor—DE CROMBRUGGHE, CHEN, GOTTEMAN, PASTAN, VARMUS, EMMER and PERLMAN (US National Institutes of Health) . NB37
Lactose operon—Regulation of transcription by cyclic AMP and pseudo-polar effects in chloramphenicol and puromycin treated *E. coli*—VARMUS, PERLMAN and PASTAN (US National Institutes of Health) . NB41

Leukaemia—Viral antigens and antisera to the group specific antigens of murine leukaemia viruses—SARMA, HUEBNER, TURNER (US National Institutes of Health), GILDEN (Flow (Laboratories), and LOG (Microbiological Associates) . . NB50
Lysozyme—^{13}C nuclear magnetic resonance spectral analysis—CHIEN and BRANDTS (Massachusetts) . NB209

Membranes—Glucose transport across a protein tetramer—LIEB and STEIN (Hebrew University, Jerusalem) NB108
Membranes—Structure of oriented lipid bilayers—LEVINE and WILKINS (London) NB69
Membranes—X-ray diffraction analysis of dispersions—WILKINS, BLAUROCK and ENGELMAN (London) NB72
Messenger RNA—Reiteration and clustering of DNA sequences coding for histones—KEDES and BIRNSTIEL (CNR, Naples and MRC, Edinburgh) NB165

Nonsense mutations—Untranslated T7 phage mRNA is stabilized in *suA* host —SUMMERS (Yale) . . NB208

Osteosarcoma — Transformation and productive infection of human osteosarcoma cells by a feline sarcoma virus —McALLISTER, FILBERT, NICOLSON, RONGEY, GARDNER (Southern California), GILDEN (Flow Laboratories) and HUEBNER (US National Institutes of Health) . NB279

Phage λ—*In vitro* repression of RNA synthesis by purified repressor — PTASHNE and STEINBERG (Harvard) NB76
Polyoma virus—Susceptibility to superinfection of hybrids between polyoma transformed BHK and normal 3T3 cells—BASILICO and WANG (New York) NB105
Protein synthesis—Distinct sites for peptidyl transferase and G-factor action—MODOLELL, VAZQUEZ and MONRO (Madrid) . . . NB109

Reovirus — Initiation of RNA synthesis *in vitro* — BANERJEE, WARD and SHATKIN (Roche Institute of molecular Biology, NJ) . . . NB169
Ribosomes—Preservation by freeze drying — CHRISTMAN and GOLDSTEIN (New York Blood Center and Cornell) NB272
RNA polymerase—Different template specificities of the enzymes of phages T3 and T7—DUNN, BAUTZ and BAUTZ (Heidelberg) . . NB94
RNA polymerase—Inhibition by streptolydigin — CASSANI, BURGESS, GOODMAN and GOLD (Geneva) . 197
RNA tumour viruses—DNA ligase and exonuclease activities in the virion—MIZUTANI, TEMIN, KODAMA and WELLS (Wisconsin) . . NB232

Simian virus—Increased transformation efficiency in rat embryo cells infected with Rauscher leukaemia virus—RHIM, GREENAWALT, TAKEMOTO and HUEBNER (US National Institutes of Health) . . NB81

Transfer RNA—Interaction between loops I and III in the tyrosine suppressor tRNA—CASHMORE (MRC, Cambridge) NB236
Transfer RNA—Sequence of yeast aspartate-tRNA—GANGLOFF, KEITH, EBEL and DIRHEIMER (Strasbourg) NB125

Ultraviolet damage—Recognition of pyrimidine dimers by *M. lysodeikticus* endonuclease—PARIBOK and TOMILIN (Academy of Sciences of the USSR) NB210
Ultraviolet irradiation—Correspondence between physical and radiobiological target size in phage λ—RADMAN (CNRS) NB277

Viral infection—A component of poliovirus-infected HeLa cells inhibits protein synthesis in a reticulocyte lysate—HUNT and EHRENFELD (Albert Einstein College of Medicine, NY) NB91
Viral transformation—Susceptibility of trisomic and triploid human fibroblasts —PAYNE and SCHMICKEL (Michigan) NB190
Viruses—Infection of mammalian unfertilized and fertilized ova with oncogenic viruses—BARANSKA, SAWICKI and KOPROWSKI (Wistar Institute) 591

NEUROBIOLOGY, PSYCHOLOGY AND BEHAVIOUR

Absolute pitch—A bimensual rhythm—WYNN (Exeter) 337
Affective disorders—Evidence for catecholamine hypothesis—MAAS, DEKIRMENJIAN and FAWCETT (Illinois State Psychiatric Institute) . . 330
Aggression—Effect of lithium on humans depends on personality and somatotype—SHEARD (Yale) . . . 113
Amphetamine—Effect on motor responses after lesions of the substantia nigra —SIMPSON and IVERSEN (Cambridge) NB30
Amygdala—Stressor-induced release of substances detected by the push-pull cannula—WINSON and GERLACH (Rockefeller) NB251
Animal behaviour—Colour preference in anurans—JAEGER (Maryland) and HAILMAN (Wisconsin) . . . 189

Brain enzyme—Indole(ethyl)amine N-methyltransferase in human brain—MANDELL and MORGAN (California) NB85
Brain—Metabolism of noradrenaline in rats affected by stress to their mothers during pregnancy—HUTTUNEN (Massachusetts General Hospital) . 53
Brain—Musical tests for functional lateralization with intracarotid amobarbital—BOGEN (Ross-Loos Medical Group, Los Angeles) and GORDON (Caltech) 524

Concept formation—Generalizing and abstracting—PEEL (Birmingham) . 600
Cortical neurones—"Facilitation" and "reversal of response" after somatic stimulation—BINDMAN, BOISACQSCHEPENS and RICHARDSON (London) NB216

Dopamine-β-hydroxylase — Elevation in serum after forced immobilization—WEINSHILBOUM, KVETNANSKY, AXELROD and KOPIN (US National Institutes of Health) NB287

Eserine—Blockade of cerebral cortical effects of strychnine and curare—BHARGAVA and MELDRUM (MRC, Carshalton) . . NB152

Habituation—Metazoan habituation behaviour is similar to that of protozoans—APPLEWHITE and GARDNER (Yale) NB284
Habituation — Theory of protozoan habituation—APPLEWHITE and GARDNER (Yale) . . NB285
Heart—"Excitation-contraction recoupling" mechanism in mammalian ventricular myocardium—KAUFMANN, HENNEKES (Freiburg), and LAB (London) NB150

5-Hydroxyindole release—Effects of N, N,-dimethyltryptamine and LSD in rat forebrain—RANDIĆ and PADJEN (Zagreb) 532
Hypothalamus—Regulation of diurnal fluctuations in hepatic enzyme activity—BLACK and AXELROD (US National Institutes of Health) and REIS (Cornell) NB185

Intelligence—No correlation with characteristics of average evoked potentials—ERTL (Ottawa) 525

L-Dopa—Effect on efflux of cerebral monoamines from synaptosomes—NG, COLBURN and KOPIN (US National Institutes of Health) . . 331
Lithium—Blockade of acetylcholine release from the cat cerebral cortex—BJEGOVIĆ and RANDIĆ (Institute Ruder Boškovic) 587

Marihuana—Distribution in monkey brain and behavioural effects—McISAAC, FRITCHIE, IDÄNPÄÄNHEIKKILÄ, HO and ENGLERT (Texas Research Institute of Mental Sciences) 593
Muscle—Sensory responses of reinnervated spindles — FUKAMI, KONISHI, ICHIKI and NAKAGAKI (Osaka) NB29

Neurobiology—A possible mechanism for presynaptic dendritic influence—RALSTON (Wisconsin) 585
Neurochemistry — Association of the ACh-phosphatidyl inositol effect with a "receptor" proteolipid—LUNT, CANESSA and DE ROBERTIS (Buenos Aires) . . . NB187
Neuropharmacology—Use of immobilized tyrosinase in production of L-dopa—WYKES, DUNNILL and LILLY (London) NB187
Noradrenaline—Effect of intraventricular administration on choline acetylase—SINGER, HO and GERSHON (New York) NB152

Scopolamine—Action on stimulus sensitivity analysed in terms of signal detection theory — WARBURTON (Reading) and BROWN (Queen's University, Belfast) 126

Tertiary amines—Use of a piperidinium derivative of N-(5′-chloropentyl)-N-methylaminoaceto-2,6-xylidide to induce sustained local anaesthesia of guinea-pig sciatic nerve *in vivo*—ROSS and ÅKERMAN (AB Astra Läkemedel) NB274
Ticklishness—Preliminary observations on externally and self-administered stimuli — WEISKRANTZ (Oxford), ELLIOTT (Sheffield) and DARLINGTON (Oxford) 598

Vision—Movement after effect depends on patterned surround—DAY and STRELOW (Monash) 55
Vision — Neutrons passing through human eyes cause visible flashes—CHARMAN, DENNIS, FAZIO and JELLEY (AERE) 522
Vision—Visual discharge time-locked with spontaneous eye movements in the cat—LOMBROSO and CORAZZA (Harvard) 464

PHYSICS, THEORETICAL PHYSICS AND CHEMISTRY

Anomalous water—Reply to Cherry, Barnes and Fullman on proposed structure—CHUA (Oxford) . . 379
Atomic absorption spectrometry—Formation of free atoms in flames—COKER and OTTAWAY (Strathclyde) PS156

Ball lightning—Is it an optical illusion ?—ARGYLE (Dominion Radio Astrophysical Observatory) 179
Ball lightning—Is it caused by antimatter meteorites ?—ASHBY and WHITEHEAD (UKAEA) 180
Ball lightning—Experience tends to rule out after-images—JENNISON (Kent) 576
Ball lightning—After-images an unlikely explanation—CHARMAN (Manchester) 576
Ball lightning—Is it spots before the eyes ?—DAVIES (Cambridge) . . 576
Bohr formula—New high $Z\alpha$ limit—BARUT (Colorado) . . PS180

Cosmology—A foundation for entropy free thermodynamics — GAL-OR (Israel Institute of Technology) . PS12
Cosmology—Antimatter and astrophysics—PUGET (Maryland) . PS173
Cosmology—Problems of the Mixmaster universe — MACCALLUM (Cambridge) PS112

Diffusion—Effect of particle shape and size distributions—RUTHVEN and LOUGHLIN (New Brunswick) PS69

Electrons—Plasmons and electron energy loss spectra—SPARGO (Melbourne)PS195
Electron diffraction—Low energy diffraction with an emission microscope—DELONG and DRAHOS (Czechoslovak Academy of Sciences) . PS196
Elementary particles—Possible existence of charged heavy leptons—RAMM (CERN) PS145

Field-ion microscopy—An alternative explanation of the basic mechanism—FORBES (Cambridge) . . PS165
Flames—Radio frequency power inductively coupled into flame seeded with calcium carbonate—JOHNSTON and LAWTON (Electricity Council Research Centre) 320
Fluids—Support for Gibbsian statistical mechanics — BARKER and HENDERSON (IBM Research Laboratory) 379

Gaseous ion clusters—SO_2-metal clusters not containing hydrogen atoms—TANG, MULKELWITZ and CASTLEMAN (Brookhaven National Laboratory) PS175
General relativity—Possible measurement of Thirring effect—FREHLAND (Freiburg) PS11
Gravitational waves—Were they detected by Mariners 6 and 7 ?—GIBBONS (Cambridge) PS113

Hydrocarbons—Relation between latent heats and Raman frequencies—LIELMEZS (British Columbia) . PS138

Nucleation—Statics and stability of small cluster nuclei—HOARE and PAL (London) PS5

Optical phenomenon—Radiation-induced light flashes observed by human subjects in fast neutron, X-ray and positive pion beams—TOBIAS, BUDINGER and LYMAN (California) . 596

Polywater—Experiments on silica-free surfaces show that models should be reconsidered—MIDDLEHURST and FISHER (CSIRO) 575

Relativity—Atwater's disk paradox refuted—SUZUKI (New York) . PS13
Relativity—Transformation to rotating coordinates, reply to Atwater—MARSH (Chicago) . . PS197
Relativity—Transformation to rotating coordinates, reply to Atwater—NOONAN (State University of New York) PS197
Relativity—Transformation to rotating coordinates, reply to Marsh and Noonan—ATWATER (Pennsylvania State) PS197
Rough particle extinction—Mie theory may be inaccurate—GREENBERG, WANG (State University of New York) and BANGS (Rensselaer Polytechnic) PS110

Solvated electron—Observation of solvation process—BAXENDALE and WARDMAN (Manchester) . . 449

PHYSIOLOGY, BIOCHEMISTRY AND ENDOCRINOLOGY

Angiotensin I—Converting enzyme localized on plasma membrane of rabbit lung—SANDER and HUGGINS (Tulane) NB27

Bilirubin—Interference with growing tissues deriving energy by glycolysis—THALER (California) . . NB218

Carvone—Evidence for the difference between the odours of two optical isomers—LEITEREG, GUADAGNI, HARRIS, MON and TERANISHI (US Department of Agriculture) . 455
Catecholamine synthesis — Effect of ACTH and dibutyryl cyclic AMP on enzymes in the adrenals of hypophysectomized rats—GEWIRTZ, KVETNANSKY, WEISE and KOPIN (US National Institutes of Health) . 462
Cholesterol—Possible mechanism of egress from the arterial wall—RUTENBERG and SOLOFF (Temple) . 123
Corticoids—Cleft palate induced in rats by intraamniotic injection—DOSTAL and JELINEK (Czechoslovak Academy of Sciences) 464
Cyclic AMP—Effect of adrenaline and prostaglandin E_1 on formation in isolated pericardial fat cells of man—MOSKOWITZ, HARWOOD, FORN, KRISHNA, RODGERS and MORROW (US National Institutes of Health) NB214

Cytochrome *c*—A stable but functional complex with yeast peroxidase in solution—NICHOLLS (Bristol) and MOCHAN (Pennsylvania) . . NB276

Erythrocytes—Age as a determinant of blood oxygen affinity—EDWARDS, CANON, ALBERTSON and BIGLEY (Oregon) 583

Haemodynamics—Tissue perfusion measured using ratio of ^{81}Rb to ^{81m}Kr incorporated—JONES (MRC Cyclotron Unit) and MATTHEWS (CMC Hospital, Vellore) 119
Human eye—Fluorescent glucoside in the lens—VAN HEYNINGEN (Oxford) 393
Hypersensitivity—Action of inhibitors of tyrosine hydrolase and dopamine β-hydroxylase on spontaneously hypersensitive rats—NAGATSU (Aichi Prefectural College of Nursing), NAGATSU, MIZUTANI (Aichi-Gakuin), UMEZAWA, MATSUZAKI and TAKEUCHI (Tokyo Institute of Microbial Chemistry) . . . 381

Oxytocin antibody—Effect on lactation and parturition in rats—KUMARESAN, KAGAN and GLICK (Coney Island Hospital) 468

Parathyroid hormone—Possible primary action—PARSONS and ROBINSON (MRC, Mill Hill) 581
Physiological transport—Plasma diffusivity decreases with age—CHISHOLM, TERRADO and GAINER (Virginia) 390
Polyphloretin phosphate—Blockade of prostaglandin $F_{2\alpha}$ action on isolated human bronchi—MATHÉ, STRANDBERG and ÅSTRÖM (Karolinska Institute) NB215
Progesterone—Inhibition of bovine serum and pancreatic amylase *in vitro* —KHAYAMBASHI, BOROUMAND, BOROUMAND, HEKMATYAR and BARNETT (Isfahan) . 529
Prostaglandins—Identification of $F_{2\alpha}$ by distension of guinea-pig uterus *in vitro* —POYSER, HORTON, THOMPSON and LOS (Edinburgh) . . 526

Releasing factors—Corticotrophin releasing factor in hypophysial portal blood different to vasopressin—FINK, SMITH and TIBBALLS (Monash) . 467
Reproduction—Prostaglandin $F_{2\alpha}$ induces luteolysis and ovulation in the hamster—LABHSETWAR (ICI) . . 528

Steroid hormones—Sex specific role in binding of ribosomes to endoplasmic reticulum—SUNSHINE, WILLIAMS and RABIN (London) . . NB133
Steroid hormones—Sex specific binding to microsomal membranes of rat liver —BLYTH, FREEDMAN and RABIN (London) . . NB137
Strontium—A study of strontium and calcium excretion and retention in children — SUTTON, SHEPHERD, HARRISON and BARLTOP (London) 396
Synthetic peptides—Purity and stability of, for example, angiotensins and kinins—VANE (London) . . 382

Thyroid—Parafollicular cells in man—TEITELBAUM, MOORE and SHIEBER (Washington, St Louis) . . 334
Tubercidin — Antischistosomal action after absorption into red cells—JAFFE, MEYMARIAN and DOREMUS (Vermont) 408

Visual pigments—Dark adaptation of human rods after a flash of bright light—ALPERN (Michigan) . . 394

POLLUTION, ECOLOGY AND BIOENERGETICS

Bioenergetics—A new quantity called quasi-energy—DYULDIN (Kiev) . 327

DDT—Food chain model for kinetics in a freshwater marsh—EBERHARDT (Battelle Memorial Institute), MEEKS (Winous Point Shooting Club, Ohio) and PETERLE (Ohio State) . . 60
DDT—Metabolism by microorganisms of water and silt of Lake Michigan—MATSUMURA, PATIL and BOUSH (Wisconsin) 325

Ecological production—Estimation in a population of unknown age—MATHEWS and MEAD (Reading) . . 403

Insecticides—Pyrethrins are metabolized rapidly in mammals—CASIDA, KIMMEL (California), ELLIOTT and JANES (Rothamsted Experimental Station) 326

Oil pollution—Solubility of crude oils and kerosene in seawater—BOYLAN and TRIPP (Woods Hole Oceanographic Institution) . . . 44
Organophosphates—Resistant and susceptible aphids differ in their aliesterase activity—NEEDHAM and SAWICKI (Rothamsted Experimental Station) 125

Radioactive fallout—Observed and predicted levels of ^{90}Sr and ^{137}Cs in milk—KIRCHMANN (CEN-SCK) and CANTILLON (Brussels) . . . 595

TECHNOLOGY

Fluid flow—Drag reduction by a polymeric aluminium soap—RODRIGUEZ (Cornell) . . . PS152

Liquid chromatography—Interactive gel networks for organic separations—FREEMAN and ENAGONIO (US National Bureau of Standards) . PS135

Metrology—Pyrolytic graphite in X-ray microcalorimeter—KEMP, MARSH and BAKER (NPL) . . . 41

Packing—Packing density of ternary mixtures of spheres—DEXTER and TANNER (National Institute of Agricultural Engineering) . PS177
Particles—Deformation of particles during briquetting—HERSEY and REES (Sandoz) PS96

Radio—Generation, detection and propagation of HF and VHF radio surface waves—WICKERSHAM (Stanford Research Institute) . . PS125
Reduction of Turbulent Drag in Liquids —GADD (NPL) . . . PS29

Tribology—Deposition of solid layer at contact surfaces from oil solution—DAVIS (Castrol) and PRESLAND (London) PS119

ZOOLOGY, BOTANY AND PLANT PHYSIOLOGY

Apical dominance—Role of water stress —McINTYRE (Regina Research Station) NB87
Aquatic weeds—Floating vegetation of Lake Kainji, Nigeria—IMEVBORE (Ife) 599

Bird flight—Nocturnal songbird migration—GAUTHREAUX (Georgia) and ABLE (Clemson) 580

Commensalism—Hermit crabs (*Dardanus*) are protected from octopus by sea anemones (*Calliactis*)—ROSS (Alberta) 401
Copper tolerance—Demonstration in the labiate *Becium homblei*—REILLY and STONE (Zambia) 403
Crabs—Cells of the haemolymph contain large quantities of glycogen and may act like liver tissue—JOHNSTON, DAVIES and ELDER (Glasgow) . 471

Ethirimol—Chiasma frequency reduced in barley by treatment with this fungicide—BENNETT (Plant Breeding Institute, Cambridge) . . . 406

Fish—Scottish record of leopard-spotted goby, *Thorogobius ephippiatus*—HEMMINGS (Department of Agriculture and Fisheries for Scotland) . . 580
Fucosterol—A metabolite of the tobacco hornworm — SVOBODA, THOMPSON and ROBBINS (US Department of Agriculture) . . . NB57

Giant clams—Self righting by Tridacnids —FANKBONER (Victoria, BC) . 579

Insects—Sex pheromone produced by symbiotic bacteria—HOYT, OSBORNE and MULCOCK (Canterbury, New Zealand) . . . 472

Juvenile hormone—Initiation of yolk deposition in cockroaches—BELL and BARTH (Texas) . . . NB220

Methyl mercury—A model for methyiation of mercury in *Neurospora*—LANDNER (Swedish Water and Air Pollution Research Laboratory) . 452
Mosses—Protonemal development altered by activated charcoal in substratum—KLEIN and BOPP (Heidelberg) 474

Photorespiration—Regulation in soybean by ribulose diphosphate carboxylase—OGREN (US Regional Soybean Laboratory) and BOWES (Illinois) NB159
Phytochrome—There may be more than one "primary reaction"—MOHR, BIENGER and LANGE (Freiburg) . 56
Phytoplankton—Net photosynthesis in a lake and diurnal oscillation in bacterial populations — SAUNDERS and STORCH (Michigan) . . . 58
Prokaryotic steroids—*Methylococcus capsulatus* grown on methane contains squalene and sterols—BIRD (London) 473
Prolactin—Control of water movement in flounder urinary bladder—HIRANO, JOHNSON and BERN (California) 469
Protozoa—Produce a "probiotic" factor stimulating growth of ciliates—MESKILL (CW Post Center, New York) NB58

Swimbladders—Of some deep sea fish contain large amounts of cholesterol—PHLEGER and BENSON (California) 122

Wheat—Exposure to low intensity light leads to senescence several weeks later —WALPOLE and MORGAN (Cambridge) NB190

MARINE POLLUTION BULLETIN

A monthly journal of news, comment and research

The MARINE POLLUTION BULLETIN appears monthly and covers the progress of science and legislation in the fight to save the life of the estuaries, coastal waters and oceans. As well as news and comment, it contains reports from all parts of the world on research into the effects of oil, metals, nuclear waste, war gases, pesticides, industrial waste and sewage disposal on the marine environment. It is read not only by scientists but also by administrators, lawyers, engineers and industrialists wishing to be kept informed about marine pollution.

CONTENTS OF VOLUME 231

Nature, pp. 1–544. *Nature Physical Science* (**PS**), pp. 1–208. *Nature New Biology* (**NB**), pp. 1–288

ARCHAEOLOGY AND PALAEONTOLOGY

Ancient coins—Micro-probe analysis and the study of Greek gold silver copper alloys—DARLING (Johnson, Matthey and Company) and HEALY (London) 443

Archaeopteryx—Reply to Heptonstall—YALDEN (Manchester) 127

Archaeopteryx—Reply to Heptonstall—BRAMWELL (Reading) 128

Archaeopteryx—Reply to Yalden and Bramwell—HEPTONSTALL (Edinburgh) 128

Bones—Red staining suggests that madder was eaten at Qumran—STECKOLL (London), GOFFER (Nuclear Research Centre, Yavne), HAAS (Hebrew University) and NATHAN (Tel Aviv) 469

Bronze Age trade—Statistical evidence for sites of ancient towns—TOBLER and WINEBURG (Michigan) . . 39

Dinosaur—The cursorial non-arboreal *Hypsilophodon*—GALTON (Bridgeport) 159

East Rudolf—Further evidence of Lower Pleistocene hominids — LEAKEY (National Museums of Kenya) . . 241

East Rudolf—Preliminary stratigraphical studies — VONDRA, JOHNSON, BOWEN (Iowa State) and BEHRENSMEYER (Harvard) 245

East Rudolf—Vertebrate faunas from three localities—MAGLIO (Harvard) 248

Hominoidea—Reply to Kinzey—LEAKEY (Nairobi) 60

Radiocarbon dating—Proto-Solutrean in Wales—OAKLEY (British Museum (Natural History)) 112

Ramapithecus wickeri—Mandible from Fort Ternan, Kenya—ANDREWS (Cambridge) 192

Shell middens—Two Mesolithic sites in the Inner Hebrides—MELLARS (Sheffield) and PAYNE (Cambridge) . 397

ASTRONOMY AND ASTROPHYSICS

Anomalous redshifts—Reply to Lewis—ARP (California Institute of Technology) PS103

Astrophysics—Origin of the magnetic fields in white dwarfs and neutron stars—O'CONNELL and ROUSSEL (Louisiana) PS32

Cosmic background — Submillimetre observations confirm non-thermal nature—PIPHER, HOUCK, JONES and HARWIT (Cornell) 375

Coronal line profiles—New coronograph and Fabry–Perot measurements—HENDERSON, LARSEN and MARSHALL (Heriot-Watt) . . . PS77

Cosmic gamma-rays—Extragalactic origin for 1 to 6 MeV flux proposed—STECKER, VETTE and TROMBKA (NASA). PS122

Cosmic gamma-rays—Two new point sources—FRYE, ALBATS, ZYCH (Case Western Reserve), STAIB (Madison College, Harrisonburg), HOPPER, RAWLINSON and THOMAS (Melbourne) . . . 372

Cosmic microwave background—Evidence for anisotropy—HENRY (Princeton) 516

Cosmology—Black and white holes—HJELLMING (US National Radio Astronomy Observatory) . . PS20

Cosmology—Hierarchical big bang cosmology—DE VAUCOULEURS (Texas) and WERTZ (Moorehead State College) 109

Crab pulsar—Rotation measure and intrinsic angle of radio emission—MANCHESTER (NRAO) . . PS189

Crab pulsar—Magnetic axis inclined at 45° to rotation axis—SMITH (Jodrell Bank) PS191

Epsilon Aurigae—In support of the collapsar model—CAMERON (Yeshiva) PS148

Extragalactic radio sources—Comments on the Rees mechanism—JENNISON (Kent) PS88

Extragalactic X-rays—Connexion with associations of galaxies—CAVALIERE, GURSKY and TUCKER (American Science and Engineering) 437

Galactic radiation—X-rays from the Coma cluster—MEEKINS, FRITZ, CHUBB, FRIEDMAN (US Naval Research Laboratory) and HENRY (Johns Hopkins) 107

Gamma-rays—Lower pulsed power than expected from NP 0532 between 250 keV and 2.3 MeV—ORWIG, CHUPP and FORREST (New Hampshire) PS171

GX5-1—Evidence of associations of this X-ray source with Milne 56—MILNE and DICKEL (CSIRO, Sydney) PS33

Infrared source—Possible upper limit to the distance of BL Lacertae—STEIN, GILLETT and KNACKE (California) 254

Interstellar grains—Objections to iron bearing garnets — DORSCHNER (Jena) PS124
Interstellar hydrogen—Conditions for condensation on solid grains—LEE, GOWLAND (UKAEA) and REDDISH (Royal Observatory, Edinburgh) PS193

Jupiter—Circularly polarized visible light detected — KEMP, SWEDLUND (Oregon), MURPHY and WOLSTENCROFT (Hawaii) 169
Jupiter—A simple model predicting the circular polarization of light—KEMP (Oregon) and WOLSTENCROFT (Hawaii) 170

Lyman-α radiation—Interpretation of extraterrestrial observations—BLUM and FAHR (Bonn) 171
Lunar dust—Radon-22 emanation and the high apparent lead isotope ages—ADAMS, BARRETTO, CLARK and DUVAL (Rice) 174

Maffei—Radio spectrum of Maffei 2—CASWELL (CSIRO) 35
Maffei—Are the Maffei galaxies members of the local group?—VAN DEN BERGH (Toronto) 35
Maffei—Radio continuum observations of Maffei 2—WEBBER and WILLIS (Illinois) 36
M87—Variations in the GHz flux density of the nucleus—GRAHAM (Cambridge) 253
Moon—Carbon chemistry of the lunar surface—CADOGAN, EGLINTON, MAXWELL and PILLINGER (Bristol) 29

Neutron stars—Neutron solidification pressure—ANDERSON and PALMER (Cambridge) PS145
NP 0532—Detailed timing observations at Arecibo Observatory—ROBERTS and RICHARDS (Arecibo) . PS25
NP 0532—Frequency structure in individual strong pulses—HEILES (Arecibo Observatory) and RANKIN (Iowa) PS97

PKS 1127-14—Circular polarization at 3,240 MHz—SEAQUIST (Toronto) PS93
Pulsar distances—New estimates based on a period-luminosity function—CAVALLO (Bologna) . . PS35
Pulsar gamma-rays—No conclusive evidence—CHATTERJEE, MURTHY, MARTHY, SREEKANTAN and TONWAR (Tata Institute) . PS126
Pulsars—Explanation for observed glitches—BÖRNER (New York) and COHEN (New Jersey) . . PS146
Pulsars—Long term intensity fluctuations of the order of months—HESSE (Cambridge) PS54

Quasars—Optical identification of PKS 0320–37—WHITEOAK and GARDNER (CSIRO) 108
Quasi-stellar objects—New method for determining lower mass limits—WHITMIRE and DAVIDS (Texas) PS102

Radio astronomy—Identification of two bright new sources—BROWNE (Jodrell Bank) 515
Radio recombination lines—Stark broadening less than predicted—PEDLAR and DAVIES (Jodrell Bank) . PS49
Radio source scintillation—Evidence of plasma streams corotating about the Sun—HOUMINER (Cambridge) PS165
Reaction cross sections—Extrapolation of $^{12}C+^{12}C$ and $^{12}C-^{12}O$ cross sections to astrophysical energies—NAGORCKA, SYMONS, ZUK (Australian National) and PATTERSON (Adelaide) PS17

Shadow bands—Visual, photographic and photoelectric detection at the March 7 solar eclipse—HULTS, BURGESS, MITCHELL and WARN (Ball State) 255
Solar chromosphere—Submillimetre maps of active regions—ADE, BECKMAN and CLARK (London) . . PS55
Solar corona—Neutrons not an energy source?—AUDOUZE (Paris) . . 381
Stellar physics—Infrared spectra of stars between 1 and 2.5 μm—SMYTH (Edinburgh), CORK, HARRIS and WALLACE (Royal Observatory, Edinburgh) PS104
Submillimetre background—Is a cosmological origin plausible?—CAROFF (Ames Research Center) and PETROSIAN (Stanford) 378

Universal cosmic rays—Importance of infrared emissions — SETTI and WOLTJER (Bologna) . . PS57

Variable radio sources—Three new examples found—BRANDIE and STULL (Michigan) . . PS149
Venus—Height of the cloud layer varies from equator to poles—MOROZ (Moscow) PS36

White dwarfs—Magnetic fields from quadratic Zeeman shift—TRIMBLE (Cambridge) PS124

X-ray background—Possible link with galactic spurs—SHKLOVSKI (USSR Academy of Sciences) and SHEFFER (Shternberg State Astronomical Institute) 173
X-ray background—Variance of count rate distribution during a rocket flight—FABIAN and SANFORD (London) PS52
X-ray source—Radio identification of GX 5-1—ILOVAISKY and RYTER (CENS) PS173
X-ray sources—New soft source in Aries–Taurus region — HAYAKAWA, KATO, KOHNO, NISHIMURA, TANAKA and YAMASHITA (Nagoya) PS76

ATMOSPHERE

Atmospheric sounding—Humidity and temperature profiles from acoustic backscatter—GETHING and JENSSEN (Melbourne) . . . PS198
Auroral arcs—6300 Å multiple arcs observed—OLD, OKUDA and KIM (New York) PS14

High altitude pollution—Persistent water vapour contamination and stratospheric measurement—GOODMAN and CHLECK (Panametrics Inc.) . 258

Ionosphere—Equatorial ionospheric absorption at different longitudes—MBIPOM (Ahmadu Bello) . PS15
Ionosphere—Radiation from artificial electron beam in the ionosphere—CARTWRIGHT and KELLOGG (Minnesota) PS11
Ionospheric undulations—Observations following Apollo 14 launching—ARENDT (US Army Electronics Command) 438

Magnetic storm—Electron content of atmosphere during storm of March 8, 1970—ARENDT (US Army Electronics Command) . . PS197

Plasmaspheric variations—Link with annual and sunspot cycles—OKSMAN (Max-Planck-Institut, Lindau) . PS12

Scott effect—Super-rotation of the upper atmosphere—WEINSTEIN (Houston) and KEENEY (Superior Oil Company) 109
Storm clouds—Further correspondence on the crown flash—GRAVES, GALL and VONNEGUT (Michigan) . . 258

VLF atmospherics—Sudden changes in the integrated intensity—CHIPLONKAR (Poona) . . . PS128

CANCER, IMMUNOLOGY AND CELL BIOLOGY

Antibodies—Herpes-like Epstein–Barr virus in leprosy—PAPAGEORGIOU, SOROKIN, KOUZOUTZAKOGLOU and GLADE (New York) . . 47
Antigen binding—Effect of immunological history on immunocompetent cells—HASKILL and AXELRAD (Queen's, Ontario) NB219
Ascites tumour:—Influence of one tumour on the growth of another in parabiotic mice—BICHEL (Cancer Research Institute, Aarhus) 449
Australia antigen—Detection in urine—TRIPATZIS and HORST (Lübeck) . 266

Biosynthesis of antibodies—WILLIAMSON (MRC, Mill Hill) . . . 359
Bone—Effect of microamp electrical currents on bone growth and its measurement using strontium-85 uptake—HAMBURY, WATSON, SIVYER and ASHLEY (Swansea) . . . 190

Cancer—Reverse transcriptase activity in virus-like particles isolated from human milk—SCHLOM, SPIEGELMAN (Columbia) and MOORE (Institute for Medical Research, NJ) . 97
Carcinogenesis—Inhibition by dietary zinc—POSWILLO and COHEN (London) 447
Cell adhesion—Polyoma virus transformation of fibroblasts decreases adhesiveness — EDWARDS, CAMPBELL (Glasgow) and WILLIAMS (MRC, Glasgow) NB147
Cell division—Nuclear and cell division in filamentous bacteria—PAULTON (Saskatchewan) . . . NB271
Cell division—Independence of cell division and DNA replication in *Bacillus subtilis*—DONACHIE, MARTIN and BEGG (MRC, Edinburgh) . NB274

Cell hybridization—Use in a study of resistance to alkylating agents—PHILLIPS and AMBROSE (Chester Beatty Research Institute) . NB146
Cell membrane—Principal glycoprotein on the surface extends into the interior in human erythrocytes—BRETSCHER (MRC, Cambridge) . . NB229
Cellular organization—Cells of the slime mould *Dictyostelium discoideum* do not sort out in the grex—FARNSWORTH and WOLPERT (London) . . 329
Cyclic AMP—Effect on the release of lysosomal enzymes from phagocytes—WEISSMANN, DUKOR and ZURIER (New York) . . NB131

Enhancing antibody—Absence in cell-mediated immunity to tumour heterografts in protein deficient rats—JOSE and GOOD (Variety Club Heart Hospital, Minneapolis) . . . 324
Enhancing antibody—Detection *in vitro* by the macrophage migration test—BERNSTEIN and WRIGHT (US National Institutes of Health) . NB 25
Erythrocytes—Glucose-dependent protection by selenium against haemolysis—ROTRUCK, HOEKSTRA and POPE (Wisconsin) . . . NB223

Genetic recombination—Exogenous mouse DNA and newly synthesized chicken DNA in culture—HILL and HILLOVA (CNRS) . . NB261
Guinea-pig complement—Effect of C4 depletion on the utilization of the terminal components by endotoxin—SNYDERMAN, GEWURZ, MERGENHAGEN (US National Institutes of Health) and JENSEN (Miami) NB152

Heart cells—Recording system for monitoring automatically in culture—BODER, HARLEY and JOHNSON (Eli Lilly and Company) . . . 531
Histocompatibility—Failure of neuraminidase to unmask trophoblast antigens — SIMMONS, LIPSCHULTZ, RIOS and RAY (Minnesota) NB112
Hybrid cells—Suppression of immunoglobulin synthesis — COFFINO, KNOWLES, NATHENSON and SCHARFF (Albert Einstein College of Medicine) NB87

IgA molecules—Electron microscope examination of complexes with antigen—FEINSTEIN, MUNN (ARC, Babraham) and MUNRO (MRC, Cambridge) 527
Immune response—Restored to sheep erythrocytes by serum factor—BYRD (Melbourne) NB280
Immune tolerance—Effect of pretreatment of dogs with antilymphocyte globulin on concentrations of injected equine γ-globulin in serum—SICKUK, SHIU, CSURNY and FORTNER (Sloan-Kettering Institute) . . . NB151
Immune tolerance—Reversible blocking effect of AMS on induction of immunity and tolerance *in vitro*—FELDMANN and DIENER (Melbourne) NB183
Immunochemistry—Idiotypy of rabbit antibodies against *Salmonella abortus-equi*—OUDIN and BORDENAVE (Institut Pasteur) . . . NB 86
Immunoglobulins — Antigenic heterogeneity of human IgD—RIVAT, ROPARTZ (Centre Départemental de Transfusion Sanguine et de Génétique Humaine, Bois-Guillaume) and ROWE (WHO International Reference Centre for Immunoglobulins) . . NB279
Immunoglobulins—Structure and role of the five glycopeptides of human IgM—SHIMIZU, PUTNAM, PAUL (Indiana), CLAMP and JOHNSON (Bristol) NB73
Immunological tolerance—Response to chemically defined determinants in dissociated spleen cell cultures—FELDMANN (Melbourne Hospital) NB21
Interferon—Effect on tumour and colony formation of L1210 cells—GRESSER, THOMAS, BROUTY-BOYÉ and MACIEIRA-COELHO (Villejuif) NB20

Leukaemia—Murine C-type virus associated with functional murine carcinomas of endocrine origin—MITCHELL, MOSES, ORTH and KORINEK (Vanderbilt) NB99
Lymphocyte inactivation—Specificity of ^{125}I-labelled antigen to thymus-derived and nonthymus-derived lymphocytes—BASTEN, MILLER, WARNER and PYE (Royal Melbourne Hospital) NB104
Lymphocytes—Antigens of the Ii system—SHUMAK, RACHKEWICH, CROOKSTON and CROOKSTON (Toronto) NB148
Lymphocytes—Interaction with antigen in electrophoretic mobility test for cellular sensitization — CASPARY (MRC, Newcastle) . . . NB24
Lymphocytes—Thymic origin in developing Peyer's patches in newborn mice—JOEL, HESS and COTTIER (Bern and Brookhaven National Laboratory) NB24
Lymphocytes—Release of specific autostimulating factor—POWLES, BALCHIN, CURRIE and ALEXANDER (Chester Beatty Research Institute) . 161
Lymphocytes—Separate thymus-dependent and thymus-independent antibody forming cell precursors—PLAYFAIR and PURVES (London) . . NB149
Lymphoid cells—Immunogenicity and antigenicity after treatment with neuraminidase—SIMMONS, RIOS and RAY (Minnesota) . . . NB179

Mammary tumours—Increase in frequency of non-viral tumour in neonatally thymectomized mice—BURSTEIN and LAW (US National Institutes of Health) 450
Membrane interactions—Vesicular stomatitis virus structural proteins and HeLa plasma-membranes—COHEN, ATKINSON and SUMMERS (Yeshiva) NB121
Membranes—Fusion *in vitro* of membranes from animal cells—KASPER and KUBINSKI (Wisconsin) . NB124
Mitochondria—Incorporation of high molecular weight polynucleotides by isolated organelles—SWANSON (Carnegie Institution of Washington) . 31
Mitochondria—Ultrastructure of isolated beef heart mitochondria by freeze etching—VAIL and RILEY (Guelph) 525
Mitosis—Inhibition in amoeba nuclei—JEON and LORCH (New York) NB91
Mouse embryo—Post blastocyst differentiation and the beginnings of heartbeat *in vitro*—HSU (Johns Hopkins) . 100

N-Acetylcysteine—Inactivation of migration inhibitory factor and delayed hypersensitivity reactions — BARTFELD and ATOYNATAN (St Vincent's Hospital, New York) . NB157
Neuraminidase—Treatment of tumour cells enhances activation of host lymphocytes—WATKINS, OGATA, ANDERSON, WATKINS and WATERS (Lahey Clinic Foundation) . NB84

Phagocytosis—Phagocytic activity of erythrocytes in amphibians during bacterial infection—PRUNESCO (Bucharest) NB143
Piroplasms—Evidence that piroplasms can undergo antigenic variation—PHILLIPS (MRC, Mill Hill) . . 323
Protein antigen—Tolerance in *Bufo marinus*—MARCHALONIS and GERMAIN (Brown) 321

Simian virus 4—Appearance of antibodies in sera of US residents with no history of polio immunization—SHAH (Johns Hopkins), OZER (US National Institutes of Health), POND (Johns Hopkins), PALMA and MURPHY (Roswell Park Memorial Institute) . 448
Slime moulds—Effect of γ-irradiation on the germination of spores of *Dictyostelium discoideum*—HASHIMOTO (Tokyo) 316
Smooth muscle—Regular organization of thick filaments in mammalian smooth muscle—RICE, McMANUS (Carnegie-Mellon), DEVINE and SOMLYO (Pennsylvania) . . NB242
Smooth muscle—Aggregation of thick filaments into ribbons in mammalian smooth muscle—SOMLYO, SOMLYO, DEVINE (Pennsylvania) and RICE (Carnegie-Mellon) . . NB243

Thymus—Early effect of adult thymectomy—BACH, DARDENNE (Hôpital Necker, Paris) and DAVIES (Chester Beatty Research Institute) . . NB110
Transformed cells—Chromosomal control of reversion—HITOTSUMACHI, RABINOWITZ and SACHS (Weizmann Institute of Science) . . 511
Transplantation—Serum proteins after a liver transplant—MURRAY-LYON, WILLIAMS, FREEMAN and CLARKE (London) . . . 45
Trophic effect—Interaction between nerve and muscle lines *in vitro*—HARRIS, HEINEMANN, SCHUBERT and TARIKAS (The Salk Institute) . . 296
Tuberculin—Antigen-binding small lymphocytes in delayed hypersensitivity—DONALD and SWANSON BECK (Aberdeen) 183
Tumour immunity—Induction in mice by cell-free homogenates of tumour cells infected with influenza virus—BOONE, BLACKMAN and BRANDCHAFT (US National Institutes of Health) 265
Tumour isografts—Transfer of immunity by systemic administration of xenogeneic "immune" RNA—DECKERS and PILCH (US National Institutes of Health) NB181
Tumour viruses—No correlation between conversion by RNA tumour viruses and increased agglutinability of cells—MOORE and TEMIN (Wisconsin) . 117
Tumours—Survival after immunization against oestrogens — CALDWELL (Yale), TILLSON (Alza Corporation), ESBER (Mason Research Laboratories) and THORNEYCROFT (Southern California) . . . 118

Viral transformation—Forssman antigen exposed not induced—BURGER (Princeton) NB125

GENERAL

Design Education in Great Britain—BLACK (Design Research Unit, London) 19

Maps—Their construction by computer from apparently inadequate data—KENDALL (Cambridge) . . 158
Modelling Cities as Dynamic Systems—BATTY (Reading) . . . 425

Rewards for Inventors—WALKER (Edinburgh 357

Social Values and Research in Human Embryology—EDWARDS (Cambridge) and SHARPE (George Washington) . 87

GENETICS, CHROMOSOMES AND EVOLUTION

Atlantic salmon—Geographic variation revealed by serum protein polymorphism—PAYNE, CHILD and FORREST (Ministry of Agriculture, Fisheries and Food) 250

Blood—Differences in sodium concentration in Negroes and Caucasians—MUNRO-FAURE, HILL and ANDERSON (London) 457
Blood type—Genetics and serology of a new type, Bm—IKEMOTO and FURUHATA (National Research Institute of Police Science, Tokyo) NB184

Chromosomes—Triple pairing in triploid chickens—COMINGS and OKADA (City of Hope National Medical Center) 119

Down's syndrome—Distinctive fluorescence of quinacrine-labelled human *G* group chromosomes—BREG (Yale), MILLER, MILLER and ALLDERDICE (Columbia) . . . NB276

Evolution—Transduction and skeletal evolution—MOURANT (London) . 466

Fluorescent chromosomes — Quinacrine fluorescence in mammals—PEARSON, BOBROW, VOSA (Oxford) and BARLOW (London) . . . 326
Fungi—Lysine pathways, enzyme regulation and cell wall structures point to lines of evolution—LÉJOHN (Manitoba) 164

Heterochromatin—Relationship of centromeric heterochromatin to fluorescent banding patterns of metaphase chromosomes of mouse—ROWLEY and BODMER (Oxford) . . . 503
Histones—Absence in blue-green alga—MAKINO and TSUZUKI (Tokyo) . 446
Human genetics—Further evidence for PGM_3: HL-A linkage — LAMM, SVEJGAARD and KISSMEYER-NIELSEN (Aarhus) . . NB109

Karyotypes—A more reliable way of analysing abnormal human karyotypes—BELCHER (Chester Beatty Research Institute) 387

Marsupials—Evolutionary implications from chromosomal and serological studies of the Caenolestidae—HAYMAN, KIRSCH, MARTIN and WALLER (Adelaide) 194
Mosquitoes—Chromosomal evidence for natural hybrids between species of *Anopheles gambiae* complex—WHITE (East African Institute of Malaria and Vector-Borne Diseases) 184

Polyploid spermatozoa—Frequency in man—SUMNER (Edinburgh) . . 49
Protein evolution—Deleterious mutations and neutral substitutions—JUKES and KING (California) 114

Reproductive isolation—Determination in mosquitoes by identifications of hybrids from enzyme variants—COLUZZI and BULLINI (Rome) . . 455

Sex—Determination in birds and mammals—MITTWOCH (London) . 432
Sex chromosomes—Multiple sex chromosomes in a Mexican fish—UYENO and MILLER (Michigan) . . 452
Sickle cell anaemia—Increased fertility in males?—EATON and MUCHA (Washington, St Louis) . . . 456
Spermatozoa—Antigens reflect genetic differences — KULANGARA and BEATTY (Edinburgh) . . NB144

***X* chromosome inactivation**—Examination of coat colour after injection of a single cell into the mouse blastocyst—GARDNER and LYON (Cambridge) 385

***Y* chromosome**—Identification by quinacrine fluorescence in a case of *YY* mosaicism — WILSON, TOWNER (Southern California), LIPSHIN and FLEISHER (Kaiser Foundation Hospital, Panorama City) . . . 388

GEOLOGY, GEOPHYSICS AND OCEANOGRAPHY

Calcite and aragonite—Equilibrium conditions between 150° C and 350° C—ZIMMERMANN (Aarhus) . PS203
Central Alps—Measurements of quartz *c*-axis orientations—MILNES (Zurich) PS117

Cummingtonites—Cation exchange similar to orthopyroxenes — SCHURMANN and HAFNER (Chicago) PS155

Dawsonite—An explanation of its natural occurrence—CHESWORTH (Guelph) PS40
Deception Island—Description of the 1970 volcanic eruption—BAKER and McREATH (Leeds) . . PS5

Earth's core—Conditions at the boundaries of the core—JACOBS (Alberta) PS170

Geomagnetism—Location of the magnetic dip equator—SANKER, NARAYAN and RAMANUJACHARY (National Geophysical Research Institute, India) PS37

Glaciation—Late Pre-Cambrian in Australia provides stratigraphic boundary—DUNN (Bureau of Mineral Resources, Canberra), THOMSON (Geological Survey of South Australia) and RANKAMA (Bureau of Mineral Resources, Canberra) . . 498
Gravitational field—Determination of Earth's fifteenth-order harmonics—GOODING (RAE, Farnborough) PS168
Gravity corers—Deficiency for sampling melobenthos and sediments—McINTYRE (Marine Laboratory, Aberdeen) 260

Loch Ness—Asymmetry of internal seiche—THORPE (National Institute of Oceanography) 306
Lunar basalt—Subsolidus cooling history—HAFNER, VIRGO, WARBURTON, FERNANDEZ-MORÁN, OHTSUKI and HIBINO (Chicago) PS79
Lunar rock—Electrical conductivity profiles explained by oxygen loss—WRIGHT (Durham) . . PS169

Mountain pass carbonatite—Unusual sulphur isotopic composition—MITCHELL and KROUSE (Alberta) . PS182

Norwegian gneisses—Unusual lanthanide distribution—ROALDSET and ROSENQVIST (Blindern) . . PS153

Petrology—Distribution of paragonite in the Mesozoic calcschists of the Alps—LIBORIO, MOTTANA (Milano) and PASQUARÉ (Bergamo) . . PS39
Plants and Soils as Indicators of Metals in the Air—GOODMAN and ROBERTS (Swansea) 287
Pleistocene sediments—Sterols identified by gas chromatography—HENDERSON, REED, STEEL and CALVIN (California) 308
Proto-Atlantic ocean—Occurrence of ophiolites representing Lower Palaeozoic oceanic crust and mantle—BIRD, DEWEY (State University of New York at Albany) and KIDD (Cambridge) PS28

Quartzite—Natural dislocation structures — WHITE, CROSBY and EVANS (Manchester) . . PS85
Quickclays—Properties explained by small particles and short range bonds—SMALLEY (Leeds) . . . 310

Red Sea—Recent hydrographic observations of brines indicate a marked increase in temperature—BREWER, WILSON, MURRAY, MUNNS and DENSMORE (Woods Hole Oceanographic Institution) . . . 37

Seafloor—Depth distribution in ocean basins and plate tectonics—RONA (US National Oceanic and Atmospheric Administration) . . . 179
Seafloor spread—Asymmetric spreading south of Australia—WEISSEL and HAYES (Columbia) . . . 518
Seafloor spreading—The Hawaiian volcano chain—McDOUGALL (Australian National University) . . PS141
Sea water—Trace element geochemistry of North Atlantic Eolian dusts—CHESTER and JOHNSON (Liverpool) 176
Sea water—Thermohaline staircase in the Mediterranean—TAIT and HOWE (Liverpool) 178
Sedimentology—Gregor's denudation of the continents—GARRELS (Scripps Institution of Oceanography) and MACKENZIE (North-western) . 382

Seismic waves—Broad band accelerometer for surface wave detection—PROTHERO, DRATLER, BRUNE and BLOCK (California) . PS80
Seismology—Model for part of the San Andreas fault system—WEERTMAN (Scott Polar Research Institute and Northwestern University) . PS9
South Atlantic fracture zones—And lines of old weakness—FULLER (Michigan Technological) . . . PS84
Spreading tectonics—Significance of magnetotelluric anisotropy—STEGENA, HORVARTH (Eötvös) and ADAM (Hungarian Academy of Sciences) . 442
Stratigraphy—Proposed new formation in Derbyshire—BOULTER (North East London Polytechnic), FORD (Leicester), IJTABA and WALSH (City) PS134

Tidal currents—Sea bottom velocity profiles south-west of England—CHANNON and HAMILTON (Bristol) 383
Troodos complex—Low seismic velocities measured — MATTHEWS, LORT, VERTUE (Cambridge), POSTER (East Anglia) and GASS (Open) PS200

Uganda basement—Minimum age of zircon crystallization—LEGGO (Florida State), AFTALION and PIDGEON (Scottish Research Reactor Centre) PS81
Upper mantle—A double discontinuity—SIMPSON, WRIGHT and CLEARY (Australian National) . . PS201

Volta Dam—Not in a typical Pre-Cambrian Shield area—BURKE (Ibadan) 439

MATERIALS

Glass ceramics—New glass ceramic made from Egyptian basaltic rocks—OMAR and EL-SHENNAWI (Cairo) . PS44

Materials—Brittleness in graphite-epoxy composites—DANIELS and HARAKAS (Monsanto) . . . PS41
Mineralogy—Crystal structure of kobellite—MIEHE (Göttingen) . PS133
Montbrayite—Proposed crystal structure —BACHECHI (Toronto) . PS67

Plastics—Dilatometric studies of crazing in rubber-toughened plastics—BUCKNALL and CLAYTON (Cranfield Institute of Technology) . . PS107

MEDICINE, BACTERIOLOGY AND PHARMACOLOGY

Ageing—Possible role of reverse transcriptases—COMFORT (London) . 530
Anaesthesia—Reversal by hydrostatic pressure — LEVER, MILLER, PATON and SMITH (Oxford) . . 368
Anaesthetics—All lipid soluble anaesthetics protect red cells—ROTH and SEEMAN (Toronto) . . NB284
Anti-inflammatory agents—Production of prostaglandin blocked in spleen—FERREIRA, MONCADA and VANE (London) NB237
Aspirin—Possible action through inhibition of synthesis of prostaglandins—VANE (London) . . . NB232
Aspirin—Selective inhibition of synthesis of prostaglandin in human platelets—SMITH and WILLIS (London) NB235

Cholera—Does cholera toxin stimulate prostaglandin synthesis?—BENNETT (London) 536
Cigarette smoking—Possible teratogenic effect—FEDRICK, ALBERMAN and GOLDSTEIN (London) . . . 529

Drug Receptors and their Function—RANG (Oxford) 91
Drugs—Noradrenaline concentration in dog's blood after intravenous injection is affected by desipramine—EBLE, GOWDEY and VANE (London) . 181

Haemophilus influenza — Transformation-defective strains—BEATTIE and SETLOW (Oak Ridge National Laboratory) NB177

Inflammation—Involvement of the liver —BILLINGHAM, GORDON (MRC, London) and ROBINSON (London) NB26

L-asparaginase — Effect on germinal centre haemolysin — BERENBAUM and BONDURANT (London) . . 318
L-asparaginase—Enhancement of tumour metastasis in mice — DEODHAR (Cleveland Clinic Foundation) . . 319
L-dopa—Alterations in tyrosine hydroxylase and monoamine oxidase activity in blood vessels—TARVER, BERKOWITZ and SPECTOR (Roche Institute of Molecular Biology) . . NB252
L-dopa—Reserpine does not increase decarboxylation — BLACK, HENDRY and IVERSEN (Cambridge) NB27

Morphine—Impairment of ACh release with facilitation of ACh action at the neuromuscular junction — FREDERICKSON and PINSKY (Manitoba) NB93
Muscular dystrophy—Structural and enzymatic changes in myosin induced by vitamin E—LOBLEY, PERRY and STONE (Birmingham) . . . 137

Neuromuscular transmission — Impairment by morphine and nalorphine—PINSKY and FREDERICKSON (Manitoba) NB94

Parkinsonism—Fusaric acid, an inhibitor of dopamine β hydroxylase affects serotonin and noradrenaline—HIDAKA (Colorado) 54
PVC—Toxicity of hospital tubing to tissue culture—DEHAAN (Carnegie Institution of Washington) . NB85

Rheumatism—Anion transport from the canine synovial cavity—DEODHAR, O'BOYLE and DICK (Glasgow) NB61

Tobacco smoking—Evidence for temporary slowing of mucociliary clearance in the lung—PAVIA, THOMSON and POCOCK (London) . . 325

Trachoma agent—Antitrachoma activity of rifamycin B and 8-0-acetylrifamycin S—BECKER (Hebrew University–Hadassah Medical School) . . 115

MOLECULAR BIOLOGY, VIROLOGY AND MOLECULAR STRUCTURE

Actinomycin—Stereochemistry of binding to DNA through formation of crystalline complex with deoxyguanosine — SOBELL, JAIN, SAKORE (Rochester) and NORDMAN (Michigan) NB200
Antibiotics—Total structure of capreomycin IB, a tuberculostatic peptide antibiotic—BYCROFT, CAMERON, CROFT, HASSANALI-WALJI, JOHNSON and WEBB (Nottingham) 301

C-type viruses—Confirmation of the presence of cross-reactive antigenic determinants on major structural polypeptides — GILDEN, OROSZLAN and HUEBNER (Flow Laboratories Inc.) NB107

DNA polymerase—Activity associated with Kilham rat virus—SALZMAN (US National Institutes of Health) NB174
DNA polymerase—Characterization of different activities in nucleus and cytoplasm of HeLa and normal human cells—WEISSBACH, SCHLABACH, FRIDLENDER and BOLDEN (Roche Institute of Molecular Biology) NB167
DNA structure—Alterations induced in native superhelices by formaldehyde—DEAN and LEBOWITZ (Syracuse) NB5
DNA synthesis—Asynchrony in a duplicated chromosomal region of *Drosophila melanogaster*—BENDER (Notre Dame), BARR (Wisconsin) and OSTROWSKI (Notre Dame) . NB217
DNA synthesis—Induction of synthesis in human leucocytes by Epstein-Barr virus — GERBER (Maryland) and HOYER (Carnegie Institution of Washington) 46

Haemoglobin mRNA—Possible cytoplasmic precursor—MAROUN, DRISCOLL and NARDONE (Catholic University of America) . . NB270

Initiator tRNA—Recognition by an initiation factor—RUDLAND, WHYBROW and CLARK (MRC, Cambridge) NB76
Insulin—Atomic positions in rhombohedral 2-zinc insulin crystals—BLUNDELL, CUTFIELD, CUTFIELD, DODSON, DODSON, HODGKIN, MERCOLA and VIJAYAN (Oxford) 506
Ion exchange—Flux ratios and isotope interaction in a membrane—de SOUSA, LI and ESSIG (Massachusetts) . 44
Isoacceptor tRNA — Interaction with tryptophan pyrrolase of *Drosophila*—JACOBSON (Oak Ridge National Laboratory) NB17

Ketone—Biosynthesis in *Artemisia*—BANTHORPE and CHARLWOOD (London) NB285

***Lac* transcription**—Essential elements for control — DE CROMBRUGGHE, CHEN, ANDERSON, NISSLEY, GOTTESMAN, PASTAN and PERLMAN (US National Institutes of Health) NB139
Lipid protein films—Regular lattice of ferritin molecules seen by electron microscopy — FROMHERZ (Max-Planck-Institut, Göttingen) . . 267

Mitochondrial DNA—Effect of ethidium bromide on yeast cells—PERLMAN and MAHLER (Indiana) . . NB12
Mitochondrial RNA polymerase—Isolated from *Neurospora crassa*—KÜNTZEL and SCHAFER (Max-Planck-Institut, Göttingen) NB265
Molecular structure—Nuclear relaxation studies of lecithin bilayers—CHAN, FEIGENSON and SEITER (California Institute of Technology) . . 110
Myelin membrane—Structure at 10 Å resolution—CASPAR and KIRSCHNER (Harvard) NB46

Nonsense mutations—Loss of dispensable endonuclease activity in relief of polarity by *suA* — KUWANO, SCHLESSINGER (Washington, St Louis) and MORSE (Harvard) . NB214
Nucleic acid—Electron energy loss spectra of bases—CREWE, ISAACSON and JOHNSON (Chicago) . . 262
Nucleic acid hybridization—DNA–RNA interaction in vast excess of DNA—MELLI, WHITFIELD, RAO, RICHARDSON and BISHOP (Edinburgh) NB8

Phage reproduction—Possible mechanism of transition of viral RNA from polysome to replication complex—KOLAKOFSKY and WEISSMANN (Zurich) NB42
Phage translation—Control mechanisms and their inhibition by F factors—MORRISON and MALAMY (Tufts Medical School, Boston) . . NB37
Poly I.Poly C—No correlation between interferon induction and antitimour effect — WEINSTEIN, GAZDAR, SIMS and LEVY (Bethesda) . NB53
Polynucleotide ligase—Function in replication of phage φX 174—SCHEKMAN and RAY (California) . NB170
Prebiotic synthesis—A route to the prebiological formation of oligonucleotides—TAPIERO and NAGYVARY (Texas) 42
Proteins at Cold Spring Harbor . . 495
Protein synthesis — Codon–anticodon binding in $tRNA^{phe}$—EISINGER, FEUER and YAMANE (Bell Telephone Laboratories) . . NB126

Repetitive DNA—Independence of yeast genome size and kinetic data—CHRISTIANSEN, BAK, STENDERUP and CHRISTIANSEN (Aarhus) NB176
Repetitive DNA—Locating satellite DNA in metaphase mammalian chromosomes by staining—YUNIS, ROLDAN, YASMINEH and LEE (Minnesota) 532
Reverse transcriptase—Separation of cellular and viral fractions in transformed cells—ROSS, SCOLNICK, TODARO and AARONSON (US National Institutes of Health) NB163
R factors—Isolation in catenated form from *E. coli* minicells—COHEN, SILVER, McCOUBREY (Stanford) and SHARP (California Institute of Technology) NB249

Rhinovirus—Haemagglutination tests for antibodies—PAGE FAULK, VYAS (California), PHILLIPS (Vermont), FUDENBERG (California) and CHISM (Vermont) . . . NB101
Ribonucleoprotein — Specific fragment from the 30S subunits of *E. coli* ribosomes — BRIMACOMBE, MORGAN, OAKLEY and COX (MRC, Mill Hill) NB209
Ribosome synthesis—Transcription of RNA and appearance of cytoplasmic ribosomes during germination of the wheat embryo—CHEN, SCHULTZ and KATCHALSKI (Weizmann Institute of Science) NB69
RNA transcription—Unwinding of DNA template—KOSAGANOV, ZARUDNAJA, LAZURKIN, FRANK-KAMENETSKII, BEABEALASHVILLI and SAVOCHKINA (Moscow) NB212
Role of Subunits in the Ribosome Cycle—DAVIS (Harvard) 153

SV40 virus—Differences in transcriptional control between infected and transformed cells—SAUER (Heidelberg) NB135

Thalassaemia—Translation of rabbit haemoglobin mRNA by ribosomes from thalassaemic humans and normal rabbits — NIENHUIS, LAYCOCK and ANDERSON (US National Institutes of Health) NB205

Viral transformation—Nucleotide composition of RNA hybridized to homologous DNA from cells transformed by avian tumour viruses—BALUDA and MARKHAM (California) . NB90

NEUROBIOLOGY, PSYCHOLOGY AND BEHAVIOUR

Aggressive behaviour—Suppression in rabbits after paired emergence from anaesthesia—CHERKIN and MEINECKE (VA Hospital, Sepulveda, and California) 195
Albinism—Visual system anomaly in the cat—CREEL (Kansas and Missouri) . 465
Auditory pathway—Evidence that acetylcholine is the transmitter in the crossed olivocochlear bundle—BOBBIN and KONISHI (Florida) . . NB222
Autonomic ganglia—A reflex arc from sensory perikarya — PURINTON, FLETCHER and BRADLEY (Minneapolis) NB63

Biochemical Research in Schizophrenia—BOULTON (Saskatchewan) . . 22
Birth order—Significance for psychiatric patients—BARRY (Pennsylvania) and BARRY (Massachusetts) . . . 57
Braille reading—Evidence for dominance of right cerebral hemisphere—HERMELIN and O'CONNOR (MRC, London) 470

Depth perception — Right hemisphere specialization reflected in visual field differences—DURNFORD and KIMURA (Western Ontario) . . . 394
Dreams—Dream recall and intellectual ability—AUSTIN (Edinburgh) . . 59
Drugs—Persistence of dose related behaviour in mice—DORR, STEINBERG, TOMKIEWICZ, JOYCE, PORSOLT and SUMMERFIELD (London) 121

Evoked potentials—Postnatal changes in the rat—THAIRU (London) . NB30

GABA—Action on prolonged spinal inhibition—CURTIS and FELIX (Australian National) . . . NB187
GABA—Effects of bicuculline in the guinea-pig brain stem—DAVIES and COMIS (Birmingham) . . NB156

Hypothalamic neurones — Antagonistic effects of α and β-adrenergically coded neurones on drinking and eating behaviour in the rat—GOLDMAN, LEHR and FRIEDMAN (New York Medical College) 453

Marihuana—Effects on solution of anagrams, memory and appetite—ABEL (Toronto) 260
Marihuana—Retrieval of information after use of marihuana—ABEL (Toronto) 58
Memory—In appetitive learning actinomycin impairs memory four hours after acquisiton—DANIELS (Exeter) . 395
Motion—Failure to estimate time of juncture of a moving object with an observer under stroboscopic lighting—CROFT (Stanford) 397
Müller-Lyer illusion—Relationship of visual to haptic version—FRISBY and DAVIES (Sheffield) 463
Myoneural junctions—Cholinesterase activity of junctions from twitch and tonic muscles—BUCKLEY and HEATON (Liverpool) . . . NB154

Neurones—Electrotonically coupled interneurones produce two types of inhibition in *Aplysia* neurones—WAZIRI (Tennessee) . . NB286
Neural transmitters—Mechanism of storage in synaptic terminals—SMYTHIES, ANTUN (Edinburgh), YANK and YORKE (Harvard) 185

Parasympathetic ganglia—Adrenergic inhibition of neurones—DE GROAT and SAUM (Pittsburgh) . . NB188
Parkinsonism—Periodicity of speech—MAWDSLEY (Edinburgh) and GAMSU (MRC, Edinburgh) . . . 315
Plasma testosterone—Dominance and aggressive behaviour in male rhesus monkeys—ROSE, HOLADAY (Walter Reed Army Institute of Research) and BERNSTEIN (Yerkes Regional Primate Research Centre) . . 366

Release of Noradrenaline from Sympathetic Endings—BURN (Oxford) . 237

Social behaviour—Reply to Young and Ziman on cycles—SIMPSON (Glasgow) 462

Visual neurones—Simultaneous recording of the input and output of the lateral geniculate—CLELAND, DUBIN and LEVICK (Australian National) NB191
Vision—Contour masking by stationary patterns—WADE and SANFORD (Dundee) 124
Vision—Is there lateral inhibition in the visual cortex? — COLTHEART (Waterloo) NB256

PHYSICS, THEORETICAL PHYSICS AND CHEMISTRY

Aerosols—Particle size distributions—CARABINE, MADDOCK and MOORE (London) . . PS18

Catalysis—Catalytic intermediate produced during oxidation of benzene—TRIMM and BROWN (Imperial College) PS156
Catalysis—Lack of support for orbital steering of enzymes—PORT and RICHARDS (Oxford) . . . 312
Coals — Raman spectra measured — MAKOVSKY, WALDSTEIN and EDWARDS (US Bureau of Mines) PS154
Crystallography—Wulff relation and the total surface free energy—SILL (London) 100

Developments in Molecular Energy Transfer—CALLEAR (Cambridge) . . 292
Drag reduction—Flow of solutions of drag-reducing polymers through an orifice—MORGAN (Admiralty Research Laboratory) . . . PS62
Drag reduction—Surface seeking characteristics of polymer solutions—WU (Hydronautics Inc.) . . PS150
Dye lasers—More systems tunable over a wide range—HAMMOND and HUGHES (US Naval Weapons Centre) PS59

Electron spin resonance—Solubilization of nitroxide spin probes by micellar solutions—OAKES (Unilever) . 38
Emission spectra—Synchronized excitation of fluorescence emission spectra—LLOYD (Home Office Forensic Science Laboratory) . . . PS64

Ferrous ferricyanide—Preparation reported at last—MURTY (St Mary's, Nova Scotia), COSGROVE and COLLINS (Texas) 311

Gas chromatography—Enrichment of CH_3D in natural CH_4—BRUNER, CANULLI, DI CORCIA and LIBERTI (Rome) . . . PS175
Gas phase displacement reactions—N_2 and CO as nucleophilic reagents—HOLTZ and BEAUCHAMP (California Institute of Technology) . PS204

Holography—Moiré pattern simulation of a hologram—ABRAMSON (Royal Institute of Technology, Stockholm) PS65
Homolytic substitution—The use of the symbol $S_{II}2$ — PRYOR (Louisiana State) PS181
Homolytic substitution—Reply—JACKSON (Sussex) . . . PS181
Hydrodynamics—More about the separation surface at the junction of two pipes—GREEN (RAE, Bedford) PS178
Hydrogen-metal solutions—Nearly stoichiometric Pd-H formed—OATES and FLANAGAN (Vermont) . PS19

Kerr metric—Retrograde motion in a Kerr metric—DE SILVA (Sussex) PS148

Laser Light Scattering and Macromolecular Brownian Motion—PECORA (Manchester) PS73
Lead determination—Detection of α-polonium activity after α-irradiation—HAMILTON (Radiological Protection Board) 524
Liquid structure—Coordination numbers in a random assemblage—GOTOH (Hokkaido) 108

Magnetism—Quasi-antiferrite behaviour of Cd, Ni, Fe hydroxides—WOLSKI (Adam Michiewicz) . . . 110
Momentum transport — Surface wave momentum and energy velocities—STARR (MIT) 41

Osmiophilic globules—Possible sites of apatite nucleation analysed by electron probe X-ray technique—HALL (Cambridge), HÖHLING (Munster) and BONUCCI (Rome) . . . 535
Oxidation—Transport mechanism for iron through porous scales—CASTLE, EMSLEY and SURMAN (Central Electricity Research Laboratories) PS86

Polyethylene spherulites—Low angle light scattering evidence—PRUD'HOMME and STEIN (Massachusetts) . PS60
Polymers—Structure of glassy carbon—JENKINS and KAWAMURA (University College, Swansea) . . 175
Polywater—Carbonate species of polywater formed on magnesium oxide?—WHATELEY (Cambridge) . PS178

Raman spectroscopy—Raman spectra of highly reactive inorganic molecules in low temperature matrix — BOAL, BRIGGS, HUBER, OZIN, ROBINSON and VANDER VOET (Toronto) PS174
Reducing agents—General rules for structures of organic reducing agents—TANI (Fuji Photo Film Co.) . PS179
Resonance fluorescence—Relation between the lifetime of the excited state and energy of excitation—KAMENOV (Sofia) . . . PS105

Shock waves—X-ray diffraction evidence for crystalline order and isotropic compression during the shock wave process — JOHNSON, MITCHELL and EVANS (California) . . . 310
Solvophobic interactions—In more non-aqueous solvents—RAY (Rockefeller) 313
Spectroscopy—Far infrared absorption spectra of mercury dihalide vapours—MALT'SEV, SELIVANOV, YAMPOLSKY and ZAVALISHIN (Moscow) PS157
Superheavy elements—Synthesis in the *r*-process—SCHRAMM and FOWLER (California Institute of Technology) 103
Superheavy elements—Possible production by proton irradiation—KATCOFF and PERLMAN (Brookhaven National Laboratory) . . . 522
Synovial fluid—Role of electrical repulsive forces—ROBERTS (Cambridge) . 434

Turbulence—Suppression of wall turbulence in dense flowing aerosols—BOOTHROYD and WALTON (Birmingham) PS129

Vortex inhibition—In dilute drag reducing polymer solutions — BALAKRISHNAN and GORDON (Florida) PS177

Wetting of solids—Contact angles of water on PTFE—PONTER and BOYES (New Brunswick) . PS152

X-ray diffraction—Use of ^{55}Fe sources—PREUSS and TOOTHACKER (Edsel B. Ford Institute) . . PS19
X-ray spectroscopy—Bonding in SiO_2 and Fe_2O_3—O'NIONS (Mineralogisk-Geologisk Museum, Oslo) and SMITH (Alberta) PS130

PHYSIOLOGY, BIOCHEMISTRY AND ENDOCRINOLOGY

Abscisic acid—Antitranspirant activity of the methyl and phenyl esters—JONES and MANSFIELD (Lancaster) . . 331
Adenine—The radiation product 6-amino-8-hydroxy-7,8-dihydropurine—VAN HEMMEN (National Defence Research Organization TNO, Rijswijk) NB79
Adipose cells—Differences between obese and normal patients—NG, POZNANSKI, BOROWIECKI and REIMER (Ottawa Civic Hospital) . . . 445
Adrenergic response—A new humoral factor with actions like those of angiotensin—SWEET, KADOWITZ and BRODY (Iowa) 263
Amines—Metabolites in lumbar cerebrospinal fluid of human subjects with restricted flow of cerebrospinal fluid—CURZON (London), GUMPERT and SHARPE (Royal Hospital, Sheffield) NB189
Amino-acids—Adaptation of metabolism in protein-depleted rats — NEALE (West Indies) NB117
Angiotensin—Action of angiotensins and synthetic renin substrate on isolated rat colon—LAW (Cambridge) . NB186
Arsenic — Suppression of inhibitory effects by phosphate in fungicides and reagents—DA COSTA (CSIRO) NB32

Cholesterol—Intracellular localization of side chain cleavage enzyme in corpora lutea of cow and rat—FLINT and ARMSTRONG (Ontario) . NB60
Collagens—Glycosylation of hydroxylysine—SPIRO (Boston), LUCAS (Manchester) and RUDALL (Leeds) . NB54
Collagens—Search for products of degradation gives clues to the function of collagenase *in vivo*—DRESDEN (Houston) NB55
Cyclamates — Ingestion by pregnant women who have abnormal offspring—STONE, MATALKA (Worcester) and PULASKI (Boston) . . . 53

Fat absorption—Role of intestinal alkaline phosphatase — LINSCHEER, MALAGELADA and FISHMAN (Tufts) NB116
Fluoride—Effects of low doses on serum enzyme of man—FERGUSON (Manchester) NB159

Gonad development—Differential growth of male and female gonads studied in chick embryo — MITTWOCH, NARAYANAN, DELHANTY and SMITH (London) . . . NB197

Heart—Feline ventricular ganglion cells—ANDERSON and SMITH (Manchester) NB155
Homocysteine—Metabolism in scurvy, growth and arteriosclerosis — McCULLY (Harvard) 391
Hormone release—Mass action feedback control on the pituitary—KASTIN, ARIMURA, SCHALLY (Tulane) and MILLER (South Carolina) . NB29

Insulin—Activation of pyruvate dehydrogenase in rat epididymal adipose tissue—DENTON, COORE, MARTIN and RANDLE (Bristol) . . NB115

Intracellular proteins — Phylogenetic study of organic anion transfer from plasma into the liver—LEVINE, REYES, LEVI, GATMAITAN and ARIAS (Albert Einstein College of Medicine and Mount Desert Island Biological Laboratory, Maine) . NB277

L-Dopa—Cerebral actions blocked by methyl receptor substances—COTZIAS, TANG, GINOS, NICHOLSON and PAPAVASILIOU (Brookhaven National Laboratory) . . . 533

Membranes—Model for action of tetrodotoxin and batrachotoxin—SMYTHIES, BENINGTON and MORIN (Edinburgh and Alabama) . . 188

Nitrogen—New nitrogenase model for reduction in protonic media—SHILOV, DENISOV, EFIMOV, SHUVALOV, SHUVALOVA and SHILOVA (Moscow) 460

Obesity—Sex difference in the number of adipose cells in rats—LEMONNIER (Paris) 50
Oestrogen receptors—Nature of oestrogen specific binding sites in the nuclei of mouse uteri—HARRIS (California) NB246
Ornithine—Presence in the urate-binding α_1-α_2 globulin—SLETTEN, AAKESSON and ALVSAKER (Oslo) . NB118

Pancreas—Effect of adrenaline and glucose on release of glucagon and insulin *in vitro* — LECLERCQ-MEYER, BRISSON and MALAISSE (Brussels) NB248
Placenta—Impermeability to maternal leukaemia cells in mice—LOEWENSTEIN, HUGHES, HOFER and KETCHEL (Tufts) 389
Placenta—Pathological changes in placentae of goat–sheep hybrids—DENT, McGOVERN and HANCOCK (London) 116
Platelets—Light scattering as a means of following change in shape—MICHAL and BORN (London) . . NB220
Photoreceptors—A photopigment with maximum absorption in the red part of spectrum—SWIHART and GORDON (South Florida) . . . 126
Pigments—Sensitivity to ultraviolet light in the eye of an insect—HAMDORF, SCHWEMER (Ruhr) and GOGALA (Ljubljana) 458
Polypeptides—Conformation of monolayers—YAMASHITA (Osaka) . 445
Prostaglandins—Biosynthesis from endogenous precursors in rabbit kidney—CROWSHAW (St Louis) . . NB240
Protein stability—Water surface energy contribution to adherence of hydrophobic groups—LEWIN (North-East London Polytechnic) . . NB80
Pseudopregnancy—Induction in rats by *p*-chlorophenylalanine — KIEFFER and HARPER (Worcester Foundation for Experimental Biology) . . 125
Pyrrolizidine alkaloids—Non-toxic metabolites of platyphylline and rosmarinine — MATTOCKS and WHITE (MRC, Carshalton) . . NB114

Serum—Isopycnometric technique based on buoyant density changes in latex beads—ANDERSON and BREILLATT (Oak Ridge National Laboratory) NB112
Sodium appetite—Disappearance of formalin-induced sodium appetite in anuria — FITZSIMONS and STRICKER (Cambridge) . NB58

Toxins—Lung oedema factor from mouldy sweet potatoes—WILSON, BOYD, HARRIS (Nashville) and YANG (Arkansas) 52
Tryptophan metabolism—Induction of serotonin and kynurenine pathways in amphibian embryos—KOSTELLOW and MORRILL (Yeshiva) . NB119

POLLUTION, ECOLOGY AND BIOENERGETICS

Antarctic skuas—Numbers and conservation problems at Cape Hallett—JOHNSTON (Otago) . . . 468

Conservation—Terrain, traffic and tundra in the Arctic—BELLAMY (Durham), RADFORTH and RADFORTH (New Brunswick) 429

Mercury—Measurement in a coastal marine environment—BURTON and LEATHERLAND (Southampton) . 440

PCB—Effect on nocturnal activity in caged robins *Erithacus rubecula* L.—ULFSTRAND, SÖDERGREN (Lund) and RABØL (Copenhagen) . 467
Polychlorinated biphenyl—Entry into estuarine food chain from sediments—NIMMO, WILSON, BLACKMAN and WILSON (Gulf Breeze) . . 50
Population size—Effect of environmental fluctuations—AYALA (Rockefeller) . 112

Vaterite precipitation—A possible pollution indicator—NATHAN (Betz Associates Ltd.) PS158

Welsh mire—Vegetation and development of Llyn—MOORE and BECKETT (London) 363

Zoology—Energetics analysis of evolution of ecosystems—MEZHZHERIN (Kiev State) 461

TECHNOLOGY

Electrical machines—Fast circuit breaker for the discharge of a storage inductor —INALL (Australian National) . 111
Explosive welding—Amplitude of interface waves—REID and JOHNSON (Manchester) . . . PS205

Microscopy—Multiple storing and decoding of image "slices" for three dimensional microscopy — BURKE (Massachusetts General Hospital), INDEBETOUW (State University of New York), NOMARSKI (Paris) and STROKE (State University of New York) 303

Superconducting electrodes — Discontinuities in Fowler–Nordheim graphs at 3.8 K—WILLIAMS (Swansea) PS42

Tribology—Chemical decomposition to form gold on a rubbing surface—DICKERT and ROWE (Mobil Research and Development Corporation) PS87

ZOOLOGY, BOTANY AND PLANT PHYSIOLOGY

Antlers—The unbrittle bones of contention — HENSHAW (College, Alaska) 469
Auxin—Production by phylloplane fungi —BUCKLEY and PUGH(Notting ham) 332

Carbonic anhydrase—May have a controlling function in photosynthesis—GRAHAM and REED (CSIRO and SYDNEY) NB81
Chagas's disease—Attraction of triatomine bug vectors to betalights—BERTRAM (London) 268
Corn smut—Successful culture of *Ustilago maydis*—DAY and ANAGNOSTAKIS (Connecticut Agricultural Experiment Station) . . . NB19

Fluoracetone—Identification of a volatile constituent formed by homogenates of *Acacia georginae* exposed to fluoride—PETERS and SHORTHOUSE (Cambridge) 123
Fungal reproduction—Induction in single A^2 isolates of *Phytophthora* by *Trichoderma viride*—BRASIER (Forestry Commission) . . . NB283

Insecticide—Induction of release of diuretic hormone in *Rhodnius*—MADDRELL (Cambridge) and CASIDA (California) 55

Marsupials—Rediscovery of *Echymipera rufescens* in Australia—HULBERT, GORDON and DAWSON (New South Wales) 330
Moth eye—Inhomogeneous refractive index in the crystalline cone—KUNZE and HAUSEN (Max-Planck-Institut, Tübingen) 392
Molluscs—Metabolic rates independent of temperature—PERCY and ALDRICH (Memorial) 393

Plant development—Flowering not induced by direct conversion of β-hydroxyethylhydrazine to ethylene—BLOCK and YOUNG (Union Oil Company of California) . . NB288
Protoplasts — Intra and interspecific fusion—POTRYKUS (Hohenheim) . 57

Rumen—Consequences for the host of changes in microbial activity—ISHAQUE, THOMAS and ROOK (Leeds) NB253

Territoriality—The white rhinoceros in South Africa—OWEN-SMITH (Natal Parks Board) 292
